EMPLOYMENT AND AVERAGE WEEKLY
WAGES AND SALARIES

JANUARY-1966-DECEMBER

Published by Authority of

The Minister of Trade and Commerce

June 1966
8003-501

Price: 30 cents
\$3.00 a year

Vol. 44—No. 1

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

NOTES

Methods and scope of monthly surveys of Employment and Average Weekly Wages and Salaries i-iv

Commencing with the February 1966 survey the following tables will be re-inserted:

Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries.

Seasonally - adjusted Index Numbers of Employment by Industrial Divisions, Regions and Provinces.

Index Numbers of Employment, Payrolls and Average Weekly Wages and Salaries.

Rotation tables, including sex distributions will continue to be published at quarterly intervals.

NOTE TO USERS

The data in this publication are for the first time on the basis of the 1960 Standard Industrial Classification. Refer to "Historical Series, Volume 1" Catalogue No. 75-504, for historic data and further information.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

JANUARY 1966

Summary

Users are advised that the data in this publication are for the first time on the basis of the 1960 Standard Industrial Classification and a 1961 time-base for index numbers. Explanations and historic data may be found in a volume entitled "Historical Series" (DBS Catalogue No. 72-504). The notes at the back of this publication describe the concepts and methods on which the revised series are based.

The publication this month contains data from June 1965 to January 1966 to supplement the historic data found in the "Historical Series". The seasonally-adjusted series, charts and historic tables usually found in this publication will be reinstated in following months.

The industrial composite index of employment (1961=100) dropped from 115.9 in December to 114.6 in January, a below average decline of 1.3 p.c. The January index is 6.7 p.c. above the level of January 1965.

Mining, manufacturing, service, and finance, insurance and real estate reported little change in employment from December. There was a slightly greater than average decrease in construction, while in the other divisions declines were below normal. The indexes for all industry divisions were above the levels of January 1965, with increases ranging from 2.9 p.c. in transportation, communication and other utilities to 16.8 p.c. in construction.

In all regions the employment indexes fell less than normally from December's level and rose from the level of January 1965. Gains over last year ranged from 5.6 p.c. in the Prairies to 11.0 p.c. in British Columbia.

The industrial composite figure for average weekly wages and salaries rose \$2.59 to \$93.59 in January. The December average was low because of short time associated with the year-end holidays. In January all industry divisions and all regions reported higher average weekly wages and salaries. The largest industrial gain from December was in construction (\$12.95) and the largest regional gain was in British Columbia (\$4.87). The industrial composite average was \$4.52 above January 1965.

Industries

Forestry. - The employment index for forestry showed a below average decline from December of 2.8 p.c. Declines in the Atlantic Region and Quebec had the greatest influence on the index. This month's figure is 5.9 p.c. above January of last year.

Average weekly wages and salaries in forestry at \$96.58 were 91 cents higher than in December and \$3.64 above January 1965. Average earnings were higher than in December in British Columbia, Ontario and the Atlantic Region and lower in Quebec.

Mining. - Employment increased 0.7 p.c. in mining between December and January. A decline in quarries and sand pits was more than offset by an increase in mining services. Gains in the Prairies and Ontario were the most important factors in the change in the Canada level from December. The mining employment index is 6.3 p.c. above last January's level.

Most larger mining industries contributed to an increase over last month in average weekly wages and salaries of \$2.63. The main exception was non-metals where, unlike most mining industries, average weekly hours were longer in December than in January. Among the regions, only Ontario reported lower wages and salaries this month.

Non-durable Goods Manufacturing. - The employment index for non-durables showed little change from December's level. Seasonal declines in food and beverages and paper were offset by gains in most other non-durables industries. The largest percentage changes from last month were increases in tobacco (largely a seasonal movement) and petroleum and coal (partly the result of the end of an industrial dispute in Ontario). Petroleum and coal was the only major non-durable industry to report employment that was below the level of January a year ago. Increases over the year in other non-durables industries ranged from 1.4 p.c. in leather and clothing to 7.2 p.c. in knitting mills.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

Changes from last month in employment in all regions were small. In the January-to-January comparison the largest changes were gains in British Columbia (6.3 p.c.) and Ontario (5.6 p.c.).

The non-durables figure for average weekly wages and salaries was \$90.45, \$2.33 above last month's level and \$4.49 higher than last January. The largest increases from December took place in knitting mills and clothing where average weekly hours showed an above average increase from December to January. Compared with a year ago, the largest increases have been in petroleum and coal and rubber.

Regional increases from December in non-durables average weekly wages and salaries were greatest in the east. In the Prairies and British Columbia the earnings tended to be depressed as the increase in average hours and average weekly wages in food and beverages was small. The greatest year-over-year gains were in British Columbia (\$6.94) and the Atlantic Region (\$5.49).

Durable Goods Manufacturing. - The durables employment index showed a small seasonal gain from December. Increases in electrical products (mainly originating in communications equipment and major appliances) and metal fabricating (mainly originating in metal stamping and fabricated structural metals) were the most important influences. In transportation equipment a decline in motor vehicle assembling was offset by gains in aircraft and motor vehicle parts and accessories. The January index was 8.8 p.c. higher than a year ago with all major industries reporting substantial gains over the year.

All regions except the Atlantic reported higher employment than in December. Compared with January 1965, regional gains in durables ranged from 6.0 p.c. in the Atlantic Region to 12.1 p.c. in the Prairie Region.

Average weekly wages and salaries in durable goods rose \$3.29 from last month, due in large part to the low average weekly hours in December. All major groups reported increases with the largest gains in metal fabricating (\$5.42) and machinery (\$4.08) where overtime was worked. Compared with last January, the largest change was a \$7.21 gain in machinery. Other increases over the year ranged from \$2.35 in wood products to \$4.58 in primary metal. Regional increases over December were lowest in the Prairies (\$1.56) and British Columbia (\$2.49) and greatest in Quebec (\$4.03).

Construction. - The employment decline from December in construction was somewhat greater than is normal for this time of year. However, the index at 112.2 was 16.8 p.c. above the level of last January. All the construction component industries reported fewer employees than last month with the greatest percentage decline in highways, bridges and streets (7.1 p.c.). The main regional influences were declines from last month in Ontario and gains in Quebec.

Construction average weekly wages and salaries rose \$12.95 from December and \$8.84 from last January. The short time at the end of December had a large depressing influence on last month's earnings figures. The largest regional gains from both last month and last year occurred in British Columbia with increases of \$29.87 from December and \$27.33 from January 1965. Very substantial gains in the other construction component of the British Columbia engineering industry were largely responsible.

Transportation, Communication and Other Utilities. - The employment index in transportation, communication and other utilities was 2.8 p.c. below December's level and 2.9 p.c. above the level of a year ago January. The decline between December and January was below average for these months. All components except railways were above last year's January figure. Regional declines from December were reported in the Prairies, Ontario (partly because of an industrial dispute in the trucking industry) and Quebec (mainly originating in highway and bridge maintenance). The Atlantic region gained and British Columbia reported little change.

Average weekly wages and salaries were higher than December in all major components of transportation, communication and other utilities except for storage where shorter hours were worked in the Prairies this month. Regional changes were small except for a \$4.88 increase in British Columbia where there was considerable short time in water transport in December.

Trade. - There was a below average decline of 5.5 p.c. in the trade employment index from 123.4 in December to 116.6 in January. The January figure is 7.7 p.c. above the same month last year. Variations from last month and last year were fairly evenly distributed among the regions.

Average weekly wages and salaries in trade were \$1.57 higher than in December and \$3.14 above last January's level. In wholesale trade the increase from last year was \$4.43 and in retail \$2.67.

Finance, Insurance and Real Estate. - The employment index in finance, insurance and real estate rose slightly from last month. The year-over-year increase was 3.8 p.c. Average weekly wages and salaries at \$90.55 changed only slightly from December and rose \$5.53 from last January.

Service. - Little change in employment was reported from December to January in service; ordinarily employment declines between these months. The January index was 10.5 p.c. above the same month last year. Average weekly wages and salaries were 63 cents above last month's level and \$4.02 higher than in January 1965.

Regions

Atlantic Region. - The January employment index for the Atlantic Region at 109.4 was down 1.0 p.c. from December, a less than seasonal decline. The main industrial influences were lower employment in trade and greater employment in transportation, communication and other utilities. The composite index is 8.3 p.c. above the level of last January. Over the year the largest industrial gain has been in construction. All four Atlantic provinces reported declines from December (the most influential being in Newfoundland) and gains from January 1965.

Average weekly wages and salaries in the Atlantic Region rose \$3.09 from December and \$2.71 from last January. The greatest changes from last year were in forestry (down \$6.48), mining (up \$6.49) and construction (up \$6.50). Provincial gains from last year ranged from \$1.78 in Newfoundland to \$3.46 in New Brunswick.

Quebec. - Employment in Quebec declined less than seasonally from December. The main industrial influences were decreases in trade and transportation, communications and other utilities. Employment in durables and construction rose this month. The January index was 6.3 p.c. higher than in January a year ago. All industry divisions contributed to the year-over-year increase with the largest percentage gains being in construction (15.8 p.c.), services (9.8 p.c.) and trade (9.7 p.c.).

Average weekly wages and salaries were up \$2.37 from December and \$5.01 from January 1965. The greatest gains from last year were in construction (\$8.91), mining (\$8.14) and forestry (\$7.48).

Ontario. - In Ontario a 1.3 p.c. decline in employment from December was close to average for this time of year. The gain over last January was 6.5 p.c. Declines from December were reported in trade, construction and transportation, communication and other utilities (partly because of the industrial disputes in trucking). Compared with last January the largest changes were gains in construction, service and durable goods manufacturing.

Average weekly wages and salaries in Ontario at \$96.58 were \$2.28 higher than in December and \$4.31 higher than in January 1965. The greatest gains from a year ago were in construction (\$8.43) and in finance, insurance and real estate (\$7.31).

Prairie Region. - In the Prairie Region the change from December in the composite employment index was largely seasonal in nature, with declines in trade and transportation, communication and other utilities having the greatest influence. Gains over last January ranged from 0.7 p.c. in transportation, communication and other utilities to 8.9 p.c. in trade. Provincially, employment in Manitoba was 4.1 p.c. higher than a year ago, in Saskatchewan 7.2 p.c. and in Alberta 6.3 p.c.

The Prairie average weekly wages and salaries figure was \$2.18 higher than last month and \$3.20 above last January's level. The largest provincial change over the year was a \$4.22 gain in Saskatchewan.

British Columbia. - The 1.1 p.c. decline in employment from December to January in British Columbia was below average for these months. In the year-to-year comparison a large rise in construction (mainly originating in the other construction component of engineering) was the greatest influence on the 11.0 p.c. increase in the composite employment index.

The gain in average weekly wages and salaries in the construction industry played a large role in the \$4.87 rise over last month and the \$6.66 increase over last January in the British Columbia industrial composite average.

TABLE 2. Employment Indexes, by Industry, for Canada

| S.I.C. Code | Industry | Employment indexes | | | | | | | | | | Employees reported January 1966 |
|----------------|---|--------------------|--------------|--------------|--------------|---------------|--------------|--------------|--------------|--------------|-----------|--|
| | | Jan. 1966 | June 1965 | July 1965 | Aug. 1965 | Sept. 1965 | Oct. 1965 | Nov. 1965 | Dec. 1965 | Jan. 1965 | | |
| | | 1961=100 | | | | | | | | | | number |
| 031-039 | FORESTRY | 99.2 | 119.3 | 130.5 | 130.4 | 123.3 | 118.6 | 116.8 | 102.1 | 93.7 | 56,414 | |
| 031 | Logging | 99.5 | 116.0 | 126.1 | 126.3 | 122.1 | 118.8 | 118.1 | 102.3 | 95.7 | 51,203 | |
| 039 | Forestry services | 96.2 | 151.2 | 172.3 | 169.1 | 134.4 | 117.0 | 104.3 | 99.4 | 74.5 | 5,211 | |
| 050-099 | MINING, INCLUDING MILLING | 105.8 | 108.7 | 110.5 | 110.1 | 107.1 | 105.9 | 106.5 | 105.1 | 99.5 | 109,387 | |
| 050-059 | Metals | 104.0 | 106.9 | 108.1 | 107.3 | 104.8 | 103.7 | 104.4 | 103.5 | 97.6 | 61,771 | |
| 051-052 | Gold | 75.9 | 84.0 | 83.8 | 80.8 | 76.6 | 76.2 | 76.8 | 76.0 | 84.1 | 12,079 | |
| 053 | Copper-gold-silver | 109.8 | 116.3 | 119.2 | 117.2 | 115.2 | 109.6 | 110.7 | 109.7 | 100.6 | 11,448 | |
| 054 | Nickel-copper | 111.8 | 111.3 | 111.5 | 112.1 | 108.7 | 109.3 | 111.0 | 110.7 | 103.5 | 15,052 | |
| 058 | Iron | 143.2 | 144.7 | 147.6 | 147.3 | 147.1 | 145.1 | 145.0 | 141.8 | 126.1 | 12,043 | |
| 061-063 | Mineral fuels | 100.8 | 102.6 | 100.7 | 101.1 | 98.9 | 100.6 | 101.1 | 100.8 | 98.9 | 20,635 | |
| 061 | Coal | 91.0 | 92.1 | 89.1 | 90.2 | 88.4 | 91.9 | 93.3 | 92.8 | 88.7 | 9,221 | |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,

MONTHLY

NOTE TO USERS

The monthly survey of employment, payrolls and manhours on which the Dominion Bureau of Statistics reports "Employment and Average Weekly Wages and Salaries" (Cat. No. 72-002) and "Man-Hours and Hourly Earnings" (Cat. No. 72-003) are based, was substantially revised with the January 1966 survey. Data on the revised concepts were tabulated for each month from January 1957 to December 1965. Thus parallel series on the old and revised bases are available for 9 years. An historical volume (Cat. No. 72-504) released in May 1966, covered revised data by months from January 1961 to May 1965.

Two publications have recently been released which complete the release of the revised historical data and contain monthly data, from January 1965 to December 1967, and annual averages from 1957 to 1967.

These publications are:

"Review of Employment and Average Weekly Wages and Salaries"

Catalogue No. 72-201

"Review of Man-Hours and Hourly Earnings" " No. 72-202

Monthly data from January 1957 to December 1960 are now available on request.

As well, there is considerable unpublished industry and geographic detail which can be obtained on request provided that the necessary requirements of the Statistics Act are met.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

NOTICE TO USERS

Employment and Average Weekly Wages and Salaries

The Employment Section of the Dominion Bureau of Statistics wishes to notify users of these publications that the delays in the preparation of the January 1966 and February 1966 issues are of a temporary nature. The transfer of the data to a 1961 time base and to the 1960 Standard Industrial Classification resulted in unexpected tabulation difficulties. These difficulties are now being overcome and the publications should be released according to the normal schedule with the summer 1966 issues.

The historical publication which will contain annual averages on the new basis for the period 1957-1960 originally scheduled for this summer will be made available at a later date. This publication will contain a technical paper covering all aspects of the revision programme.

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

FEBRUARY 1966

Summary

The unadjusted industrial composite index of employment (1961=100) rose slightly from 114.4 in January to 114.5 in February. The index was 6.8 p.c. higher than in February of last year. Seasonally-adjusted employment continued to advance this month; the index at 119.7 was 0.7 p.c. higher than in January.

The main industrial influences on the seasonally-adjusted index were small gains over January in manufacturing, construction and transportation, communication and other utilities. In manufacturing small increases were reported in both durables and non-durables as employment rose in all the larger manufacturing industries except tobacco and food and beverages. Among the other industries the largest change from January in the adjusted employment indexes was an 8.3 p.c. gain in forestry. Other changes ranged from a 0.3 p.c. decline in mining to a 0.7 p.c. rise in service.

All regions contributed to the higher seasonally-adjusted composite index. Quebec rose 1.0 p.c. from January's level, Ontario rose 0.3 p.c., the Prairies 1.5 p.c. and British Columbia 0.6 p.c. In the Atlantic Region declines in Nova Scotia and New Brunswick were offset by a gain in Newfoundland.

Average weekly wages and salaries at the industrial composite level rose \$1.12 from January to \$94.91. The latest figure is \$5.73 above February of last year. In the year-over-year comparison the largest industrial gain was in construction (\$11.75) and the largest regional increase was in British Columbia (\$7.81).

Employment

The following table shows percentage changes from last month in the unadjusted employment indexes for the industry divisions in the regions and in the seasonally-adjusted and unadjusted indexes for Canada. The table indicates that changes from January were generally small and fairly evenly distributed among industry divisions and regions. Forestry was an exception to this pattern. In forestry, particularly in Quebec, irregular as well as seasonal fluctuations play a large role in month-to-month employment changes.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Humbers, February 1966

| Industry | Seasonally-adjusted | Unadjusted for seasonal variation | | | | | |
|---|---------------------|-----------------------------------|-----------------|--------|---------|----------------|------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | 8.3 | - 5.8 | - 10.3 | - 17.5 | - 1.0 | 0.4 | 6.7 |
| Mining | - 0.3 | - 0.1 | - 1.5 | 0.6 | - 0.5 | 0 | 1.3 |
| Manufacturing: | | | | | | | |
| Durable goods | 0.2 | 0.5 | 0.1 | 0 | 0.7 | 0.4 | 1.0 |
| Non-durable goods | 0.3 | 0.5 | 0.3 | 0.7 | 0.4 | 0.2 | 1.3 |
| Construction | 2.3 | - 0.2 | 0.3 | - 0.2 | 3.0 | 5.0 | 2.0 |
| Transportation, communication and other utilities | 0.7 | 0.3 | 0.8 | 0.2 | - 0.1 | - 1.1 | 0.4 |
| Trade | 0.3 | - 0.7 | - 1.0 | - 0.2 | - 0.7 | 0.6 | - 1.6 |
| Finance, insurance and real estate | 0.3 | 0.3 | - 0.2 | 0 | 0.2 | 0.5 | 1.2 |
| Service | 0.7 | 1.1 | - 0.6 | 1.2 | 0.8 | 1.8 | 2.1 |
| Industrial composite | 0.7 | 0.1 | - 0.8 | 0 | 0.1 | 0.2 | 0.9 |

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported February 1966 |
|---|---------------|-----------|-----------|-----------|-----------|-----------|-----------------------------------|-----------|-----------|----------------------------------|
| | Employment | | | Payrolls | | | | | | |
| | Feb. 1966 | Jan. 1966 | Feb. 1965 | Feb. 1966 | Jan. 1966 | Feb. 1965 | Feb. 1966 | Jan. 1966 | Feb. 1965 | |
| | 1961=100 | | | | | | dollars | | | number |
| <u>INDUSTRY DIVISION</u> | | | | | | | | | | |

(1) For other urban areas see Table 6.

The other large change from January's level was a 2.3 p.c. advance in the seasonally-adjusted construction index. Construction employment has been very strong over the past half year. This month's unadjusted construction index was 17.2 p.c. above the level of last February compared with a 6.8 p.c. increase in the industrial composite index in the same period. All components of construction have contributed to the gain over the year: general contractors (15.1 p.c.) special trade contractors (14.3 p.c.), highways, bridges and streets (26.3 p.c.) and other engineering (21.7 p.c.).

In other industry divisions changes in employment from January were generally small. Among the larger manufacturing industries the largest changes were increases in knitting mills (2.0 p.c.) and clothing (1.4 p.c.) and decline in tobacco (1.6 p.c.). In durable goods manufacturing all the main components reported small gains from January except wood products which remained unchanged.

Average Weekly Wages and Salaries

The table below shows changes from January in average weekly wages and salaries for industry divisions in Canada and the Regions. The following paragraphs mention the larger variations found in the table.

The largest increases over last month were in forestry, where month-to-month fluctuations are often large. Longer hours of work was an explanation given by a number of firms for the rise this month.

In mining a \$2.95 gain in the Prairie Region partly reflected gains in petroleum and gas where overtime payments and some wage increases were reported.

Average weekly wages and salaries in durable goods manufacturing rose \$1.60 in Quebec and \$1.92 in the Prairies. The increase in Quebec was partly the result of gains in transportation equipment (mainly originating in the aircraft and shipbuilding components) and in metal fabricating where average hours and average hourly earnings were higher this month. In the Prairies large gains were reported in non-metallic mineral products and wood products; in both cases longer hours were worked this month.

In non-durable goods manufacturing the smallest increase over January in average weekly wages and salaries was in British Columbia where the food industries showed little change in earnings.

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries, February 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
|---|--------|-----------------|--------|---------|----------------|------------------|
| Forestry | 10.41 | 11.01 | 8.73 | 5.46 | 6.33 | 12.24 |
| Mining | 0.91 | - 0.46 | - 0.43 | 1.05 | 2.95 | - 1.73 |
| Manufacturing: | | | | | | |
| Durable goods | 1.19 | 0.92 | 1.60 | 1.05 | 1.92 | 0.50 |
| Non-durable goods | 0.84 | 0.81 | 0.66 | 1.07 | 1.04 | 0.07 |
| Construction | 2.47 | - 0.45 | 1.83 | 1.94 | 4.99 | 5.74 |
| Transportation, communication and other utilities | 0.89 | 0.34 | 3.31 | 0.98 | 0.94 | - 0.05 |
| Trade | 0.87 | 0.80 | 0.41 | 0.91 | 1.27 | 1.19 |
| Finance, insurance and real estate | 0.09 | 0.66 | - 0.41 | 0.15 | 0.39 | 0.64 |
| Service | 0.78 | 1.34 | 0.67 | 0.63 | 1.16 | 0.53 |
| Industrial composite | 1.12 | 1.09 | 0.90 | 1.00 | 1.57 | 1.50 |

The greatest gain over last month in construction occurred in British Columbia. All construction components rose in that province, with the greatest gains being in the engineering industry, especially in highways bridges and streets. Longer average weekly hours was the main cause. Earnings in construction have shown great strength in British Columbia in recent months; the February figure is \$32.97 above the level of February a year ago. In the Prairie Region, the higher construction earnings figure resulted from gains in both building and engineering.

In transportation, communication and other utilities, the \$3.31 gain from January originated mainly in highway and bridge maintenance.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|---------------------|-------------|---------------------|---------------------------|---------------------|------------------|---------------------|---------------|---------------------|-------------------|---------------------|--------------|---------------------|
| | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | All manufactures | | Durable goods | | Non-durable goods | | Un-adjusted | Seasonally-adjusted |
| | | | | | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | | |

(1) Table will be completed in subsequent publications as data become available.

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS
CANADA, GOODS PRODUCING INDUSTRIES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA SERVICE PRODUCING INDUSTRIES AND INDUSTRIAL COMPOSITE

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), WITH UNADJUSTED INDEX NUMBERS, ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

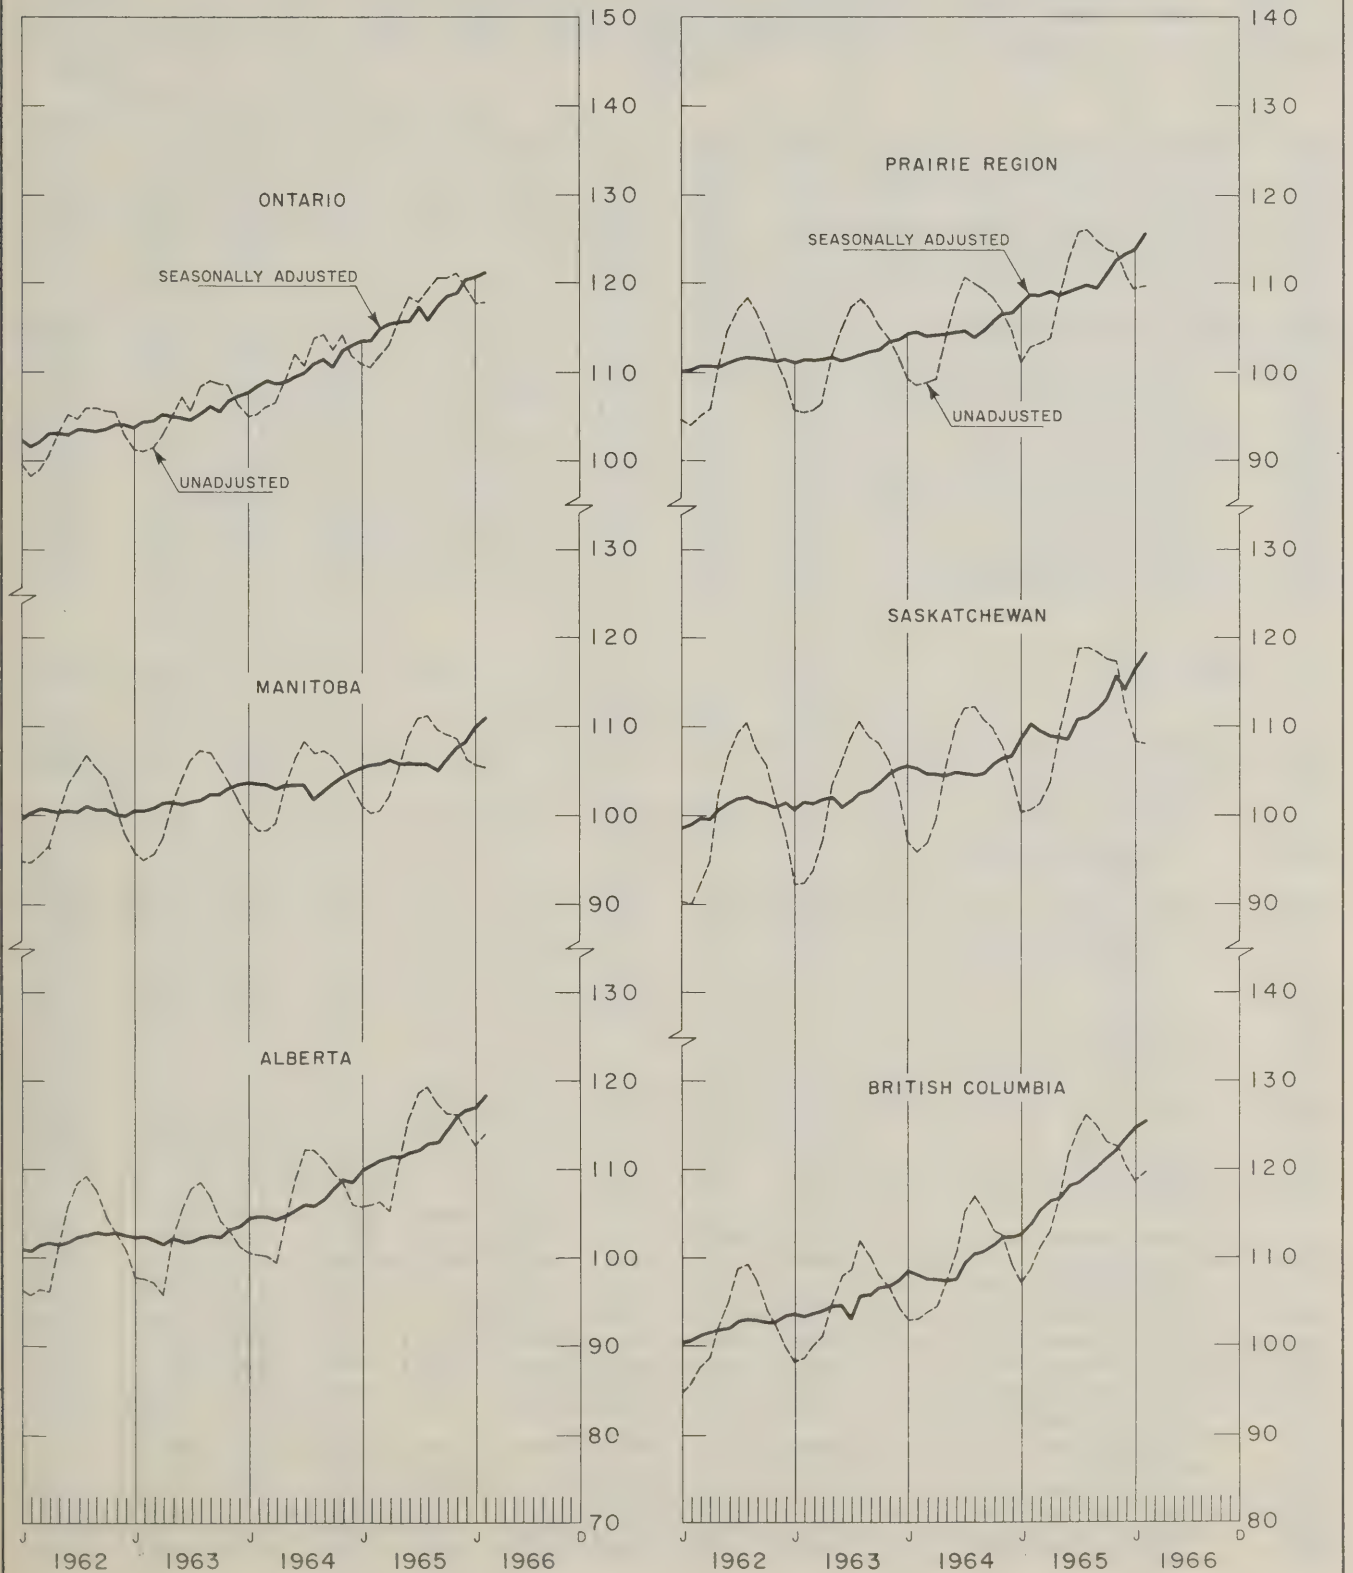

TABLE 4. Employment and Average Weekly Wages and Salaries, by Industry, for Canada

| S.I.C. Code | Industry | Employment indexes | | | | Average weekly wages and salaries | | | | Employees reported February 1966 |
|----------------|---|--------------------|--------------|--------------|--------------|--------------------------------------|--------------|--------------|--------------|---|
| | | Feb. 1966 | Jan. 1966 | Feb. 1965 | Feb. 1964 | Feb. 1966 | Jan. 1966 | Feb. 1965 | Feb. 1964 | |
| | | 1961=100 | | | | dollars | | | | number |
| 031-039 | FORESTRY | 86.4 | 91.8 | 85.6 | 84.1 | 106.32 | 95.91 | 98.63 | 94.05 | 49,103 |
| 031 | Logging | 87.1 | 92.9 | 86.6 | 85.1 | 108.27 | 96.93 | 100.32 | 95.53 | 44,787 |
| 039 | Forestry services | 79.7 | 81.0 | 75.6 | 74.5 | 86.05 | 84.74 | 79.69 | 77.50 | 4,316 |
| 050-099 | MINING, INCLUDING MILLING | 105.9 | 106.0 | 100.5 | 96.4 | 119.09 | 118.18 | 110.34 | 105.80 | 109,594 |

(1) Table will be completed in subsequent publications as data become available.

AVERAGE WEEKLY WAGES AND SALARIES, URBAN AREAS INDUSTRIAL COMPOSITE

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

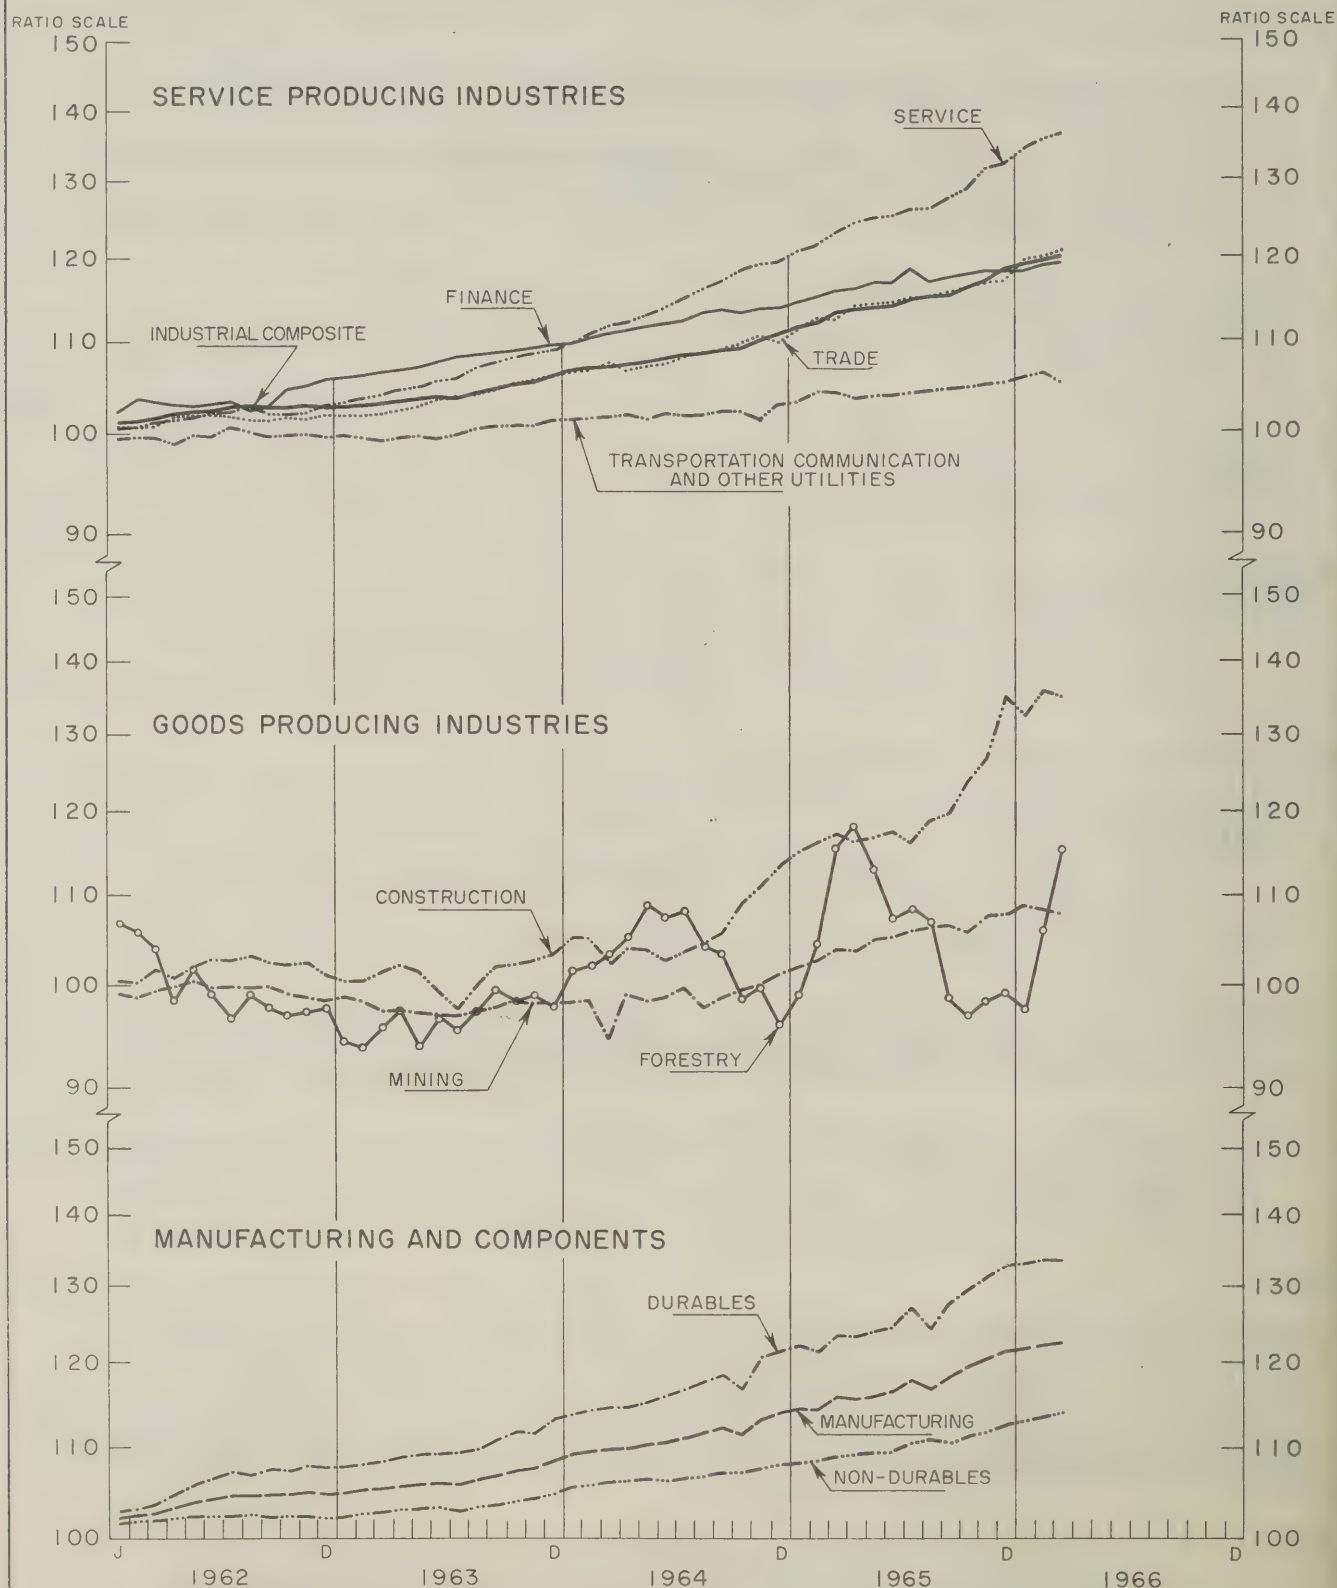

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

MARCH 1966

Summary

The unadjusted industrial composite index of employment (1961 = 100) rose 0.5 p.c. from 114.5 in February to 115.1 in March. The index was 6.2 p.c. higher than in March of last year. Seasonally-adjusted, the index rose 0.2 p.c. from last month to 119.9.

The main industrial developments influencing the seasonally-adjusted composite index were gains over last month in the adjusted indexes in manufacturing, trade and forestry which more than offset declines in construction and transportation, communication and other utilities. In manufacturing, a decrease in the seasonally-adjusted index in durables was more than offset by a gain in the non-durables index.

With the exception of Quebec, all regions contributed to the rise in the seasonally-adjusted composite index. The decline in Quebec was largely the result of decreased employment in construction.

Average weekly wages and salaries at the industrial composite level fell 10 cents from February to \$94.99 in March. The latest figure is \$4.96 above March last year. In the year-over-year comparison the largest industrial gain was in construction (\$9.97), and the largest regional increase was in British Columbia (\$7.55).

Employment

The following table shows percentage changes from last month in the unadjusted employment indexes for the industry divisions in the regions and in the seasonally-adjusted and unadjusted indexes for Canada.

Percentage Changes in Employment from February to March, 1966

| Industry | Seasonally-adjusted | Unadjusted for seasonal variation | | | | | |
|---|---------------------|-----------------------------------|-----------------|--------|---------|----------------|------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | 8.9 | - 13.2 | - 13.7 | - 33.1 | - 8.4 | - 4.6 | 1.1 |
| Mining | - 0.5 | 0.1 | - 1.0 | 1.7 | - 0.1 | - 0.7 | - 0.2 |
| Manufacturing | 0.2 | 0.6 | 2.3 | 0.6 | 0.3 | 1.3 | 0.6 |
| Durable goods | - 0.1 | 0.6 | 1.3 | 1.1 | 0.4 | 1.2 | - |
| Non-durable goods | 0.5 | 0.6 | 2.9 | 0.4 | 0.2 | 1.3 | 1.6 |
| Construction | - 0.6 | 0.9 | 4.4 | - 4.4 | 3.5 | 3.0 | 1.8 |
| Transportation, communication and other utilities | - 1.2 | 0.2 | - 3.3 | 0.4 | 0.7 | 0.7 | 0.5 |
| Trade | 0.7 | 1.7 | 2.1 | 1.8 | 1.7 | 1.1 | 2.2 |
| Finance, insurance and real estate | 0.3 | - | - 0.2 | 0.1 | 0.3 | - 0.6 | - 0.1 |
| Service | 0.6 | 1.3 | 1.0 | 0.6 | 1.2 | 1.9 | 2.6 |
| Industrial composite | 0.2 | 0.5 | 0.1 | - 0.1 | 0.7 | 1.0 | 1.1 |

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported March 1966 |
|---|---------------|-----------|------------|------------|-----------|------------|-----------------------------------|-----------|------------|-------------------------------|

(1) For other urban areas see Table 6.

The largest change from February in the seasonally-adjusted index at the Canada level was an 8.9 p.c. increase in forestry. Irregular and seasonal fluctuations play a large role in the month-to-month employment changes in forestry, especially in Quebec.

The seasonally-adjusted index for transportation, communication and other utilities was 1.2 p.c. lower than in February. At the Canada level, the transportation component fell slightly as railway transport and highway and bridge maintenance showed small declines. The largest change occurred in the Atlantic Region where seasonal layoffs in water transport and services were reported.

In construction, gains over last month were reported in all regions except Quebec where a 4.4 p.c. decline reflected less employment in the engineering component, largely as the result of an industrial dispute in other engineering.

In other industry divisions changes from February were generally small. Among the larger durable goods manufacturing industries the greatest change was a 1.3 p.c. increase in transportation equipment where advances in aircraft and parts and shipbuilding more than offset a slight decline in motor vehicles. Increases were recorded in all other major components except in wood products where seasonal layoffs were reported in all regions in furniture, and in primary metals. In non-durables, most components gained over last month. Exceptions were declines in textiles where an industrial dispute occurred in Quebec, in tobacco where there was a large seasonal decline, and in leather and knitting mills.

Average Weekly Wages and Salaries

The table below shows changes from February in average weekly wages and salaries for industry divisions in Canada and the regions. The largest change from last month at the Canada level was a \$1.49 decrease in transportation, communication and other utilities. A seasonal decline in hours worked in the highway and bridge maintenance component of transportation was the major source of this decline. Short-time and reduced overtime in water transport and services in British Columbia and the Atlantic region also contributed.

In forestry, there was a seasonal drop of \$8.43 in British Columbia. In mining, a \$2.40 drop in the Prairie region reflected seasonal declines in earnings in all components except metals.

Changes from last month in average weekly wages and salaries in durable goods manufacturing were generally small, ranging from a 17 cent decrease in British Columbia to an 86 cent increase in Quebec. In non-durables the largest change occurred in British Columbia where the 98 cent decrease was partially attributable to fewer hours worked in paper and allied industries.

In trade, the decline in British Columbia originated mainly in department stores where increases in the employment of lower paid workers were greater than in other regions.

Changes in Average Weekly Wages and Salaries from February to March 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
|--|--------|--------------------|--------|---------|-------------------|---------------------|
| (in dollars) | | | | | | |

(1) Table will be completed in subsequent publications as data become available.

P Preliminary figures.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS
CANADA, GOODS PRODUCING INDUSTRIES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA SERVICE PRODUCING INDUSTRIES AND INDUSTRIAL COMPOSITE

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

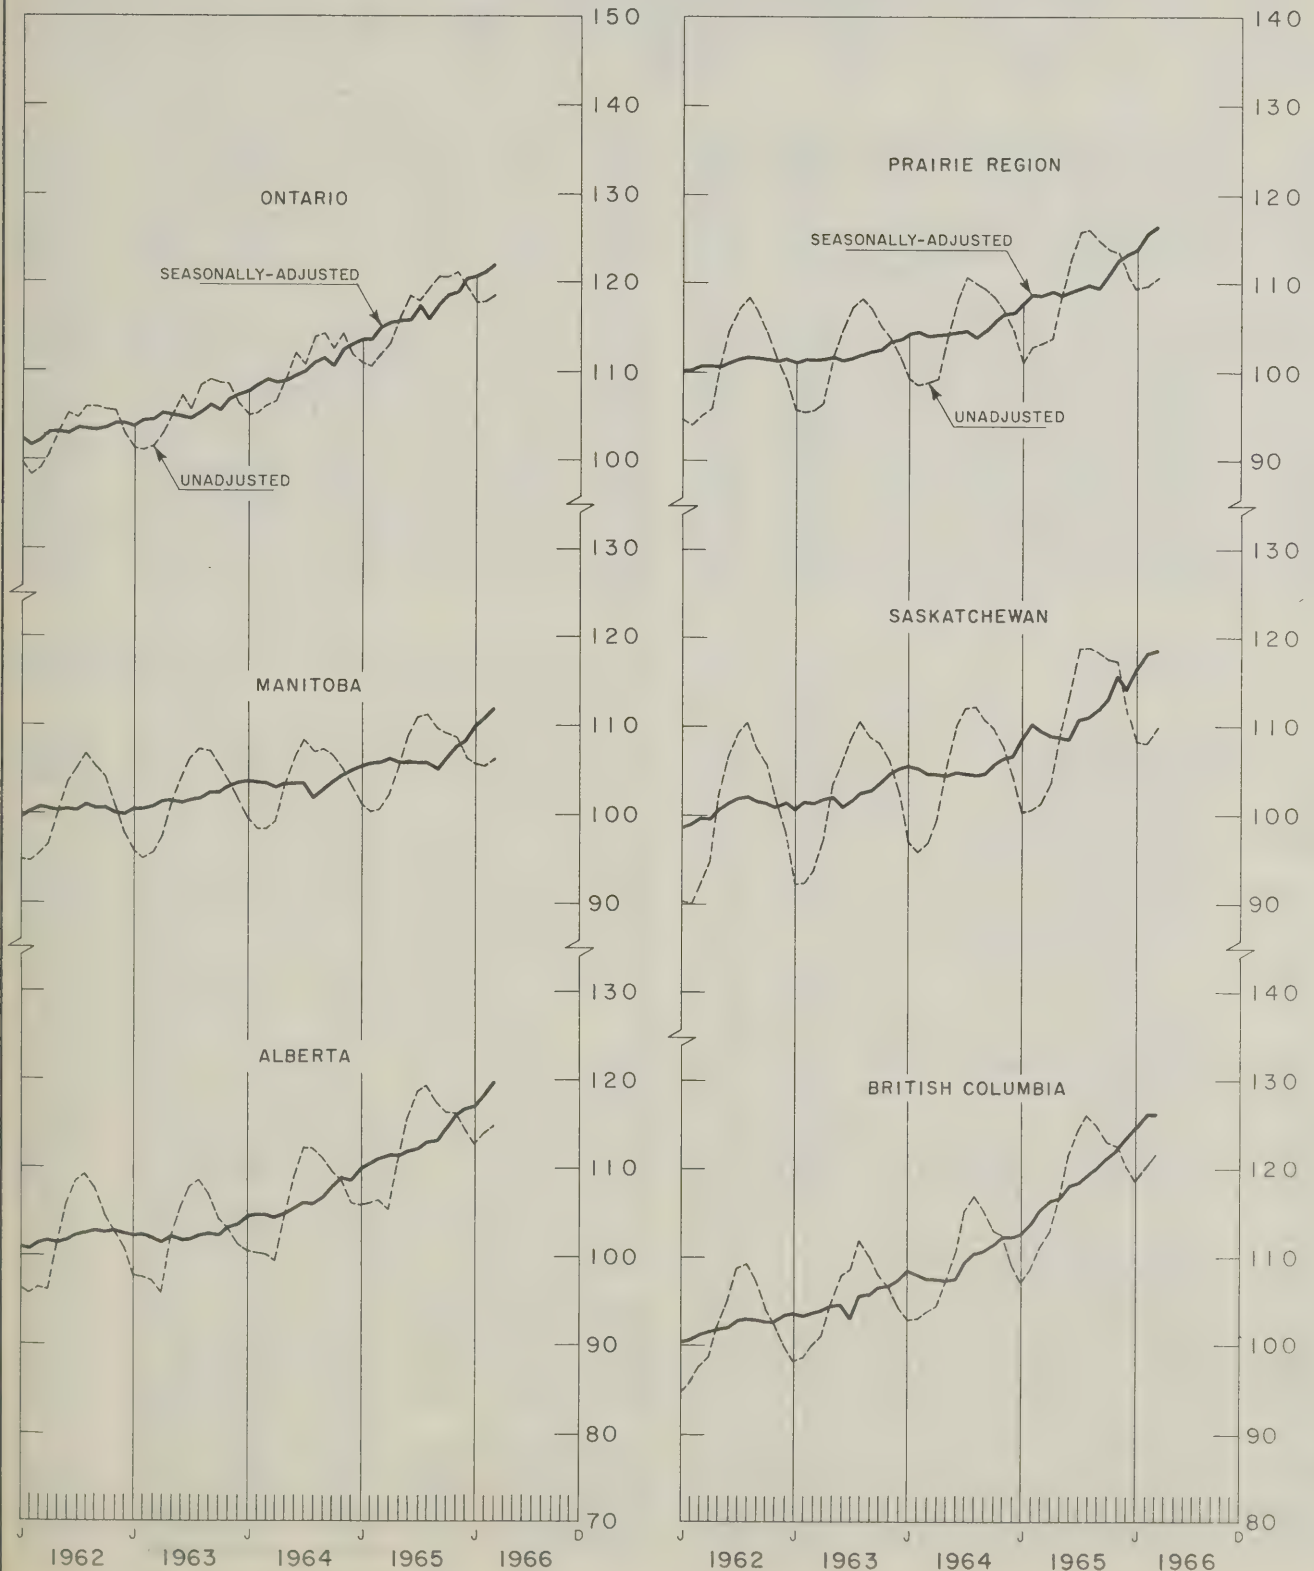

TABLE 4. Employment and Average Weekly Wages and Salaries, by Industry, for Canada

| S.I.C. Code | Industry | Employment indexes | | | | Average weekly wages and salaries | | | | Employees reported March 1966 |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1964 was 68.1 per cent of all manufacturing employees reported in the Employment Section's survey. In mining the hourly-paid wage-earners represented 71.4 p.c. of reported employment and in construction 77.9 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages (1)

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

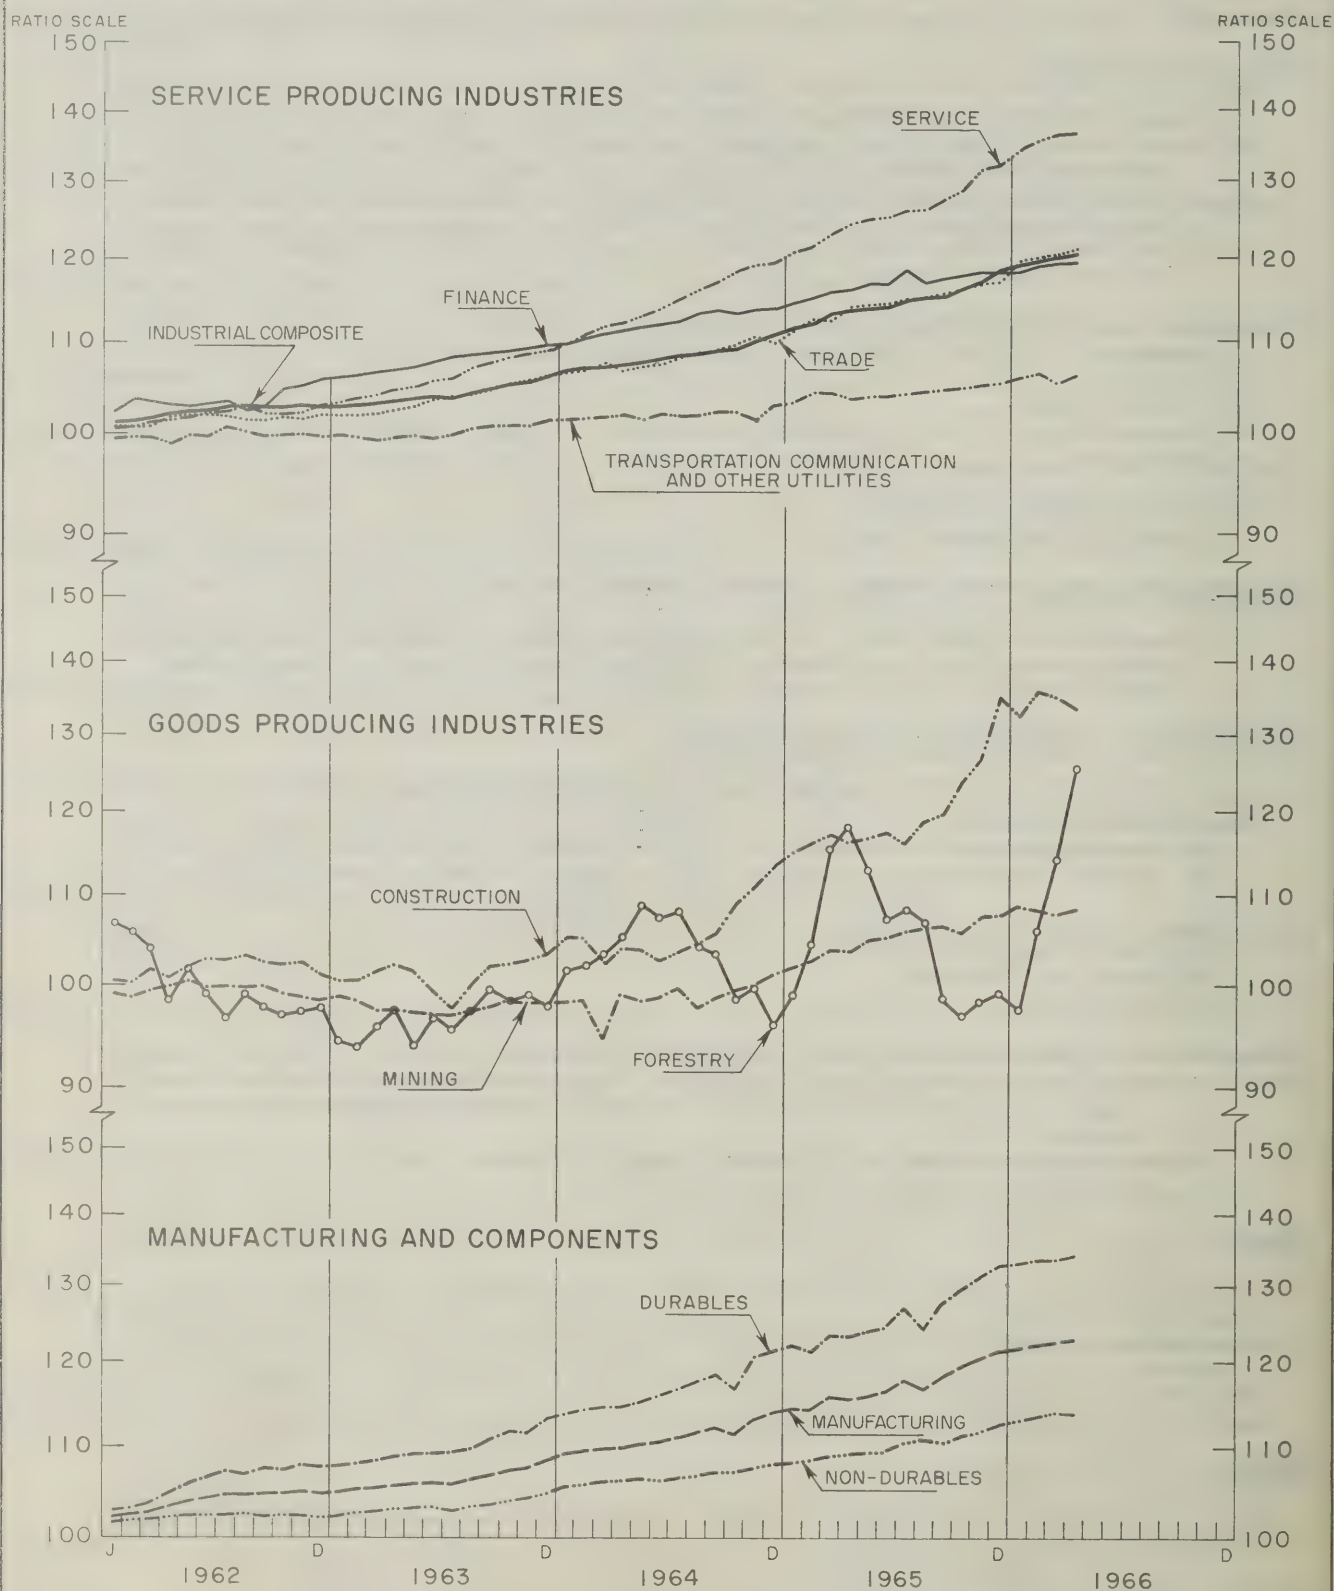

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

APRIL 1966

Summary

The unadjusted industrial composite index of employment (1961 = 100) rose 1.2 p.c. from 115.0 in March to 116.4 in April. One-half of the increase was of a seasonal nature; seasonally-adjusted, the index rose 0.6 p.c. to 120.5. The unadjusted index was 6.4 p.c. higher than in April of last year.

The main industrial influences on the seasonally-adjusted composite index were gains in forestry, trade and transportation, communication and other utilities. A decline in construction reflected a somewhat less than normal increase in employment for this time of year. In manufacturing, a gain in durables more than offset a slight decline in non-durables. Small increases occurred in the remaining industry divisions.

The main regional influences on the adjusted industrial composite index of employment were gains in Ontario, the Atlantic Region and Quebec. British Columbia showed a small increase while the Prairie Region fell slightly. The largest percentage change took place in the Atlantic Region as a result of gains in Nova Scotia and New Brunswick.

Average weekly wages and salaries at the industrial composite level rose by 68 cents from \$95.12 in March to \$95.80 in April. The industrial composite figure gained \$5.48 from April last year. In the year-over-year comparison, the largest industrial gain was in forestry (\$10.55) and the largest regional increase was in British Columbia (\$9.06).

EMPLOYMENT

The table below indicates that the largest change in the seasonally-adjusted data was a 10.0 p.c. increase in forestry. Unadjusted, the index fell 10.1 p.c. with declines reported in all regions. This reflects the irregular nature of the industry and the large seasonal factor involved.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, April 1966

| Industry | Seasonally-adjusted | Unadjusted for seasonal variation | | | | | |
|---|---------------------|-----------------------------------|-----------------|--------|---------|----------------|------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | 10.0 | - 10.1 | - 16.7 | - 11.1 | - 17.6 | - 7.4 | - 2.0 |
| Mining | 0.7 | - 1.2 | 3.5 | 0.4 | 0.8 | - 8.7 | 1.7 |
| Manufacturing | 0.2 | 0.4 | 3.9 | - 0.6 | 0.8 | - 0.8 | 1.3 |
| Durable goods | 0.5 | 0.6 | 0.8 | 0.2 | 1.1 | - 2.9 | 0.1 |
| Non-durable goods | - 0.1 | 0.2 | 5.9 | - 1.1 | 0.3 | 0.6 | 3.3 |
| Construction | - 1.0 | 6.9 | 13.8 | 11.1 | 6.0 | 1.2 | 1.3 |
| Transportation, communication and other utilities | 1.1 | 3.0 | - 5.0 | 8.7 | 2.3 | 1.6 | 0.9 |
| Trade | 0.8 | 1.1 | 1.6 | 0.3 | 1.9 | 1.2 | - 0.1 |
| Finance, insurance and real estate | 0.3 | - | 0.8 | - 0.2 | 0.1 | 0.4 | - 0.1 |
| Service | 0.1 | 1.5 | 1.2 | 2.2 | 1.5 | - 0.7 | 3.5 |
| Industrial composite | 0.6 | 1.2 | 1.2 | 1.8 | 1.3 | - 0.1 | 1.0 |

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

(1) For other urban areas see Table 6.

The 1.1 p.c. gain in transportation, communication and other utilities arose mainly in the transportation component. All regions showed increases except the Atlantic Region where there was a seasonal decline in water transport and services. The largest change was an 8.7 p.c. increase in Quebec, with both transportation and storage showing substantial seasonal increases in employment.

Gains in trade were reported in all regions except British Columbia, where a decline in whole-sale trade more than offset a slight increase in retail trade. Retail trade was the leading component in all regions.

Large increases in construction employment were reported in the Atlantic Region and in Quebec. In the Atlantic Region, seasonal increases in highways, bridges and streets led to substantial gains in the engineering component, increased activity in the building component also contributed to the 13.8 p.c. rise. The principal cause of the 11.1 p.c. increase in Quebec was the settlement of an industrial dispute in other engineering. Other regions showed smaller gains and the 6.9 p.c. increase at the Canada level was somewhat less than is normal for this time of year.

Among the major manufacturing industries changes were generally small. All durable goods industries reported slight increases except wood products where layoffs were seasonal. In non-durables, the largest change was a 5.2 p.c. decrease in textiles, largely resulting from an industrial dispute in Quebec. A 5.0 p.c. decline in tobacco was of a seasonal nature.

In mining, the large (8.7 p.c.) decline in the Prairie Region was mainly attributable to seasonal layoffs in services incidental to mining.

AVERAGE WEEKLY WAGES AND SALARIES

The table below indicates that changes from last month were generally small in most industry divisions. At the Canada level, the largest change was a \$3.53 increase in forestry mainly as a result of a substantial rise in British Columbia.

British Columbia also showed the largest gain in construction, with seasonal increases in hours worked reported in the building component. The increase of \$3.57 in Quebec arose mainly in engineering where seasonal increases in hours were reported and a wage increase in other engineering followed the settlement of an industrial dispute. The 33 cent decline in Ontario was largely the result of a seasonal increase in the proportion of hours worked by lower paid highway workers.

Lower average weekly wages and salaries in mining were reported in most regions, reflecting a general seasonal reduction in hours worked.

All components of transportation, communication and other utilities showed increases over last month. Overtime was reported in transportation in British Columbia. In Quebec, many firms reported seasonal increases in hours and overtime in both the transportation and storage components.

Changes in manufacturing were generally small. In non-durables, the largest change occurred in British Columbia, mainly reflecting overtime and wage increases in the paper industry. In durables, the Prairie Region showed the largest change, with primary metals and metal fabricating reporting overtime.

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries April, 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
|--|--------|--------------------|--------|---------|-------------------|---------------------|
| dollars | | | | | | |
| Forestry | 3.53 | 5.45 | - 4.57 | - 1.88 | - 6.66 | 10.25 |

(1) Table will be completed in subsequent publications as data become available.

P Preliminary figures.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS
CANADA, GOODS PRODUCING INDUSTRIES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA SERVICE PRODUCING INDUSTRIES AND INDUSTRIAL COMPOSITE

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

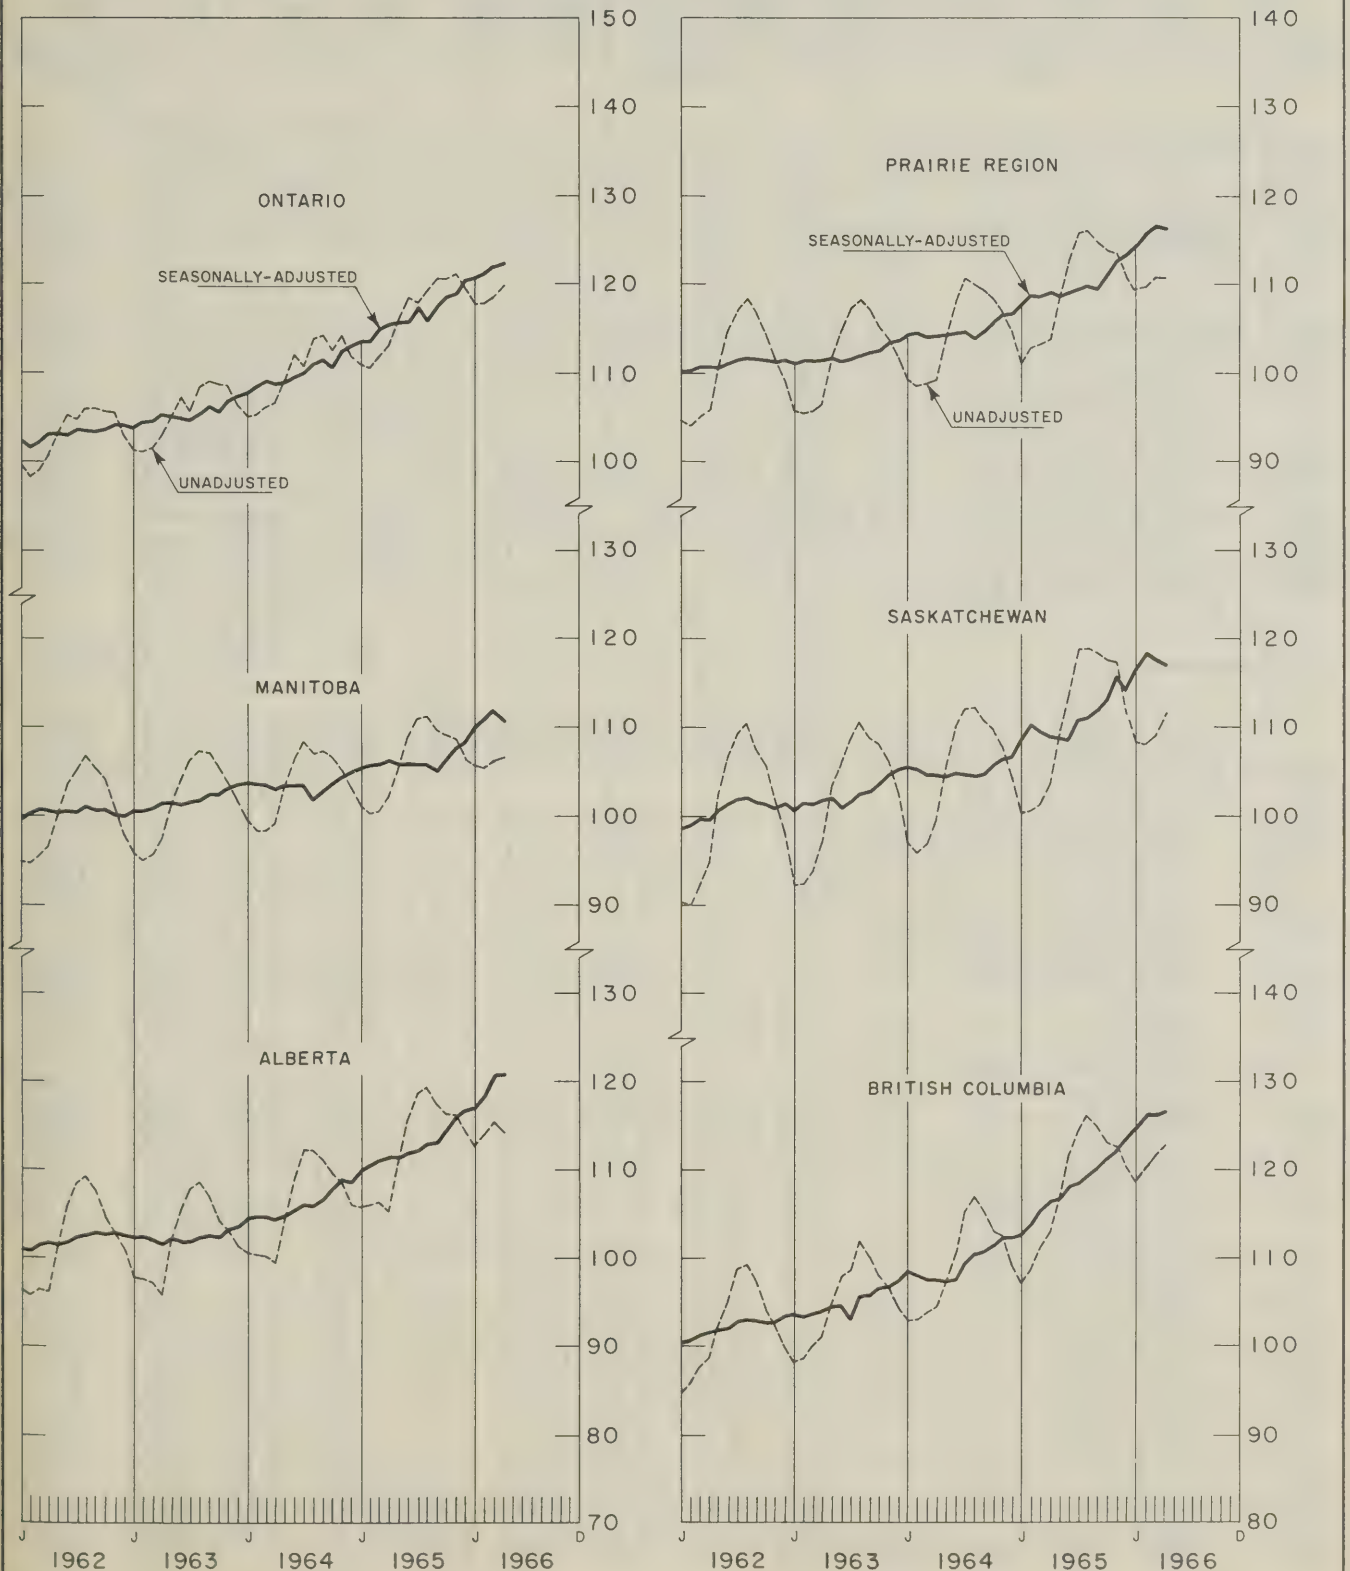

TABLE 4. Employment and Average Weekly Wages and Salaries, by Industry, for Canada

| S.I.C. Code | Industry | Employment indexes | | | | Average weekly wages and salaries | | | | Employees reported Apr. 1966 |

(1) Table will be completed as data become available.

(2) Subject to revision.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

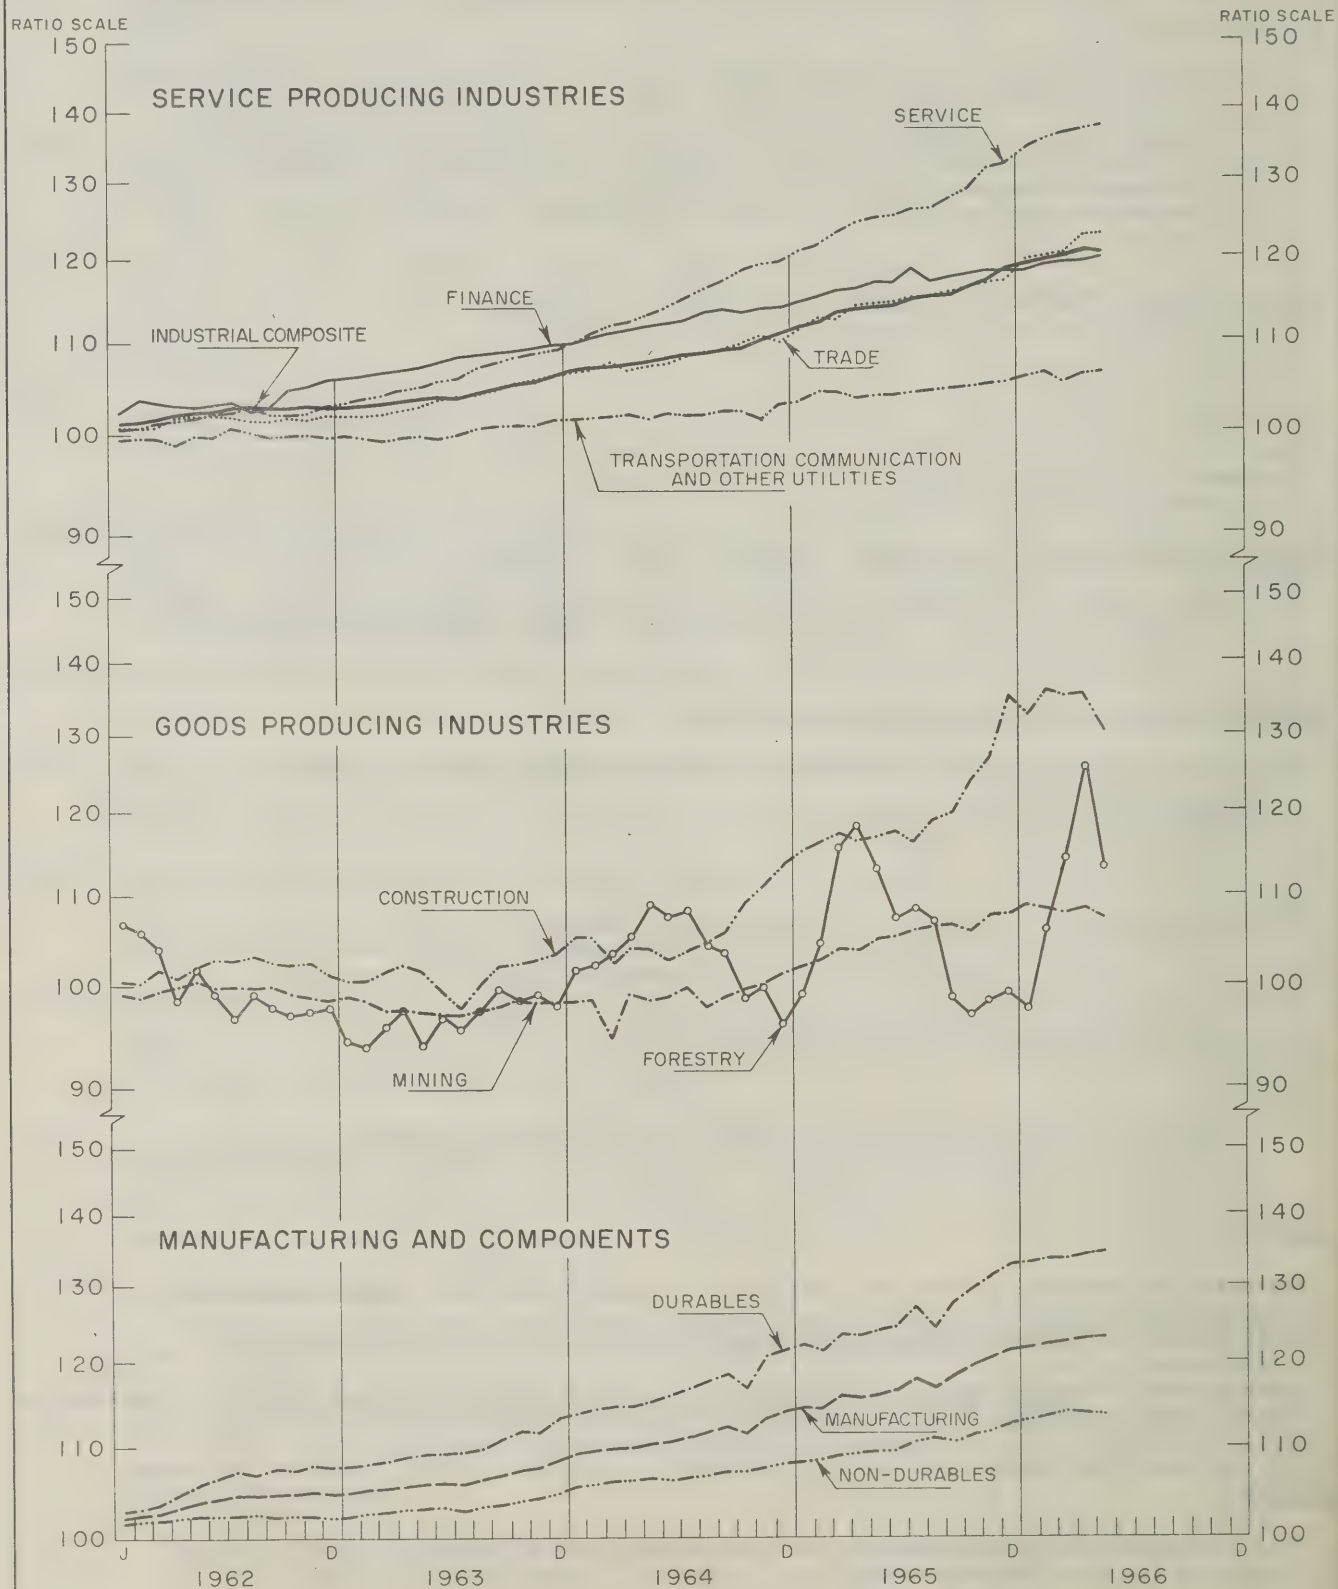

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

MAY 1966

Summary

The unadjusted industrial composite index of employment (1961=100) rose 2.9 p.c. from 116.7 in April to 120.1 in May.* The index was 6.1 p.c. higher than in May of last year. The increase over last month was less than is normal; seasonally-adjusted, the index fell 0.4 p.c. to 120.3.

Industrially, the main influences on the seasonally-adjusted composite index were forestry and construction, where increases in employment were less than normal for this time of year. In manufacturing the adjusted index rose by 0.1 p.c. as a slight decline in non-durables was more than offset by a gain in durables. All other industry divisions showed small increases, with the exception of mining where there was a 0.8 p.c. decline. Transportation, communication and other utilities, trade and service all reported 0.1 p.c. increases. The index for finance, insurance and real estate was 0.3 p.c. higher.

Among the regions, changes from last month in the seasonally-adjusted employment indexes ranged from a 1.4 p.c. decline in British Columbia to a 0.4 p.c. increase in Ontario. All other regions showed declines: Atlantic (1.2 p.c.), Quebec (0.7 p.c.), and Prairie (0.9 p.c.).

Average weekly wages and salaries at the industrial composite level showed little change from last month. Gains in construction, mining and trade were offset by declines in other industry divisions. The latest composite figure was \$5.47 above May of last year.

EMPLOYMENT

The table below indicates that the largest change in the seasonal-adjusted data was a 10.1 p.c. decline in forestry. Unadjusted, the index rose 38.1 p.c. Employment in forestry usually shows large irregular and seasonal fluctuations.

In construction, the 9.5 p.c. increase in the unadjusted index was below average for May. The engineering component rose 19.1 p.c. and building rose by 4.8 p.c. In British Columbia, where the increase was well below the Canada average, employment in building fell 1.6 p.c. from last month.

In transportation, communication and other utilities, the 2.8 p.c. gain from last month was the result of increases in Ontario (largely as a result of the termination of the industrial dispute in trucking), in the Atlantic and Prairie Regions. The decline in Quebec partly reflected a strike in stevedoring.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, May 1966

| | Seasonally-adjusted | Unadjusted for seasonal variation | | | | | |
|---|---------------------|-----------------------------------|-----------------|--------|---------|----------------|------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | - 10.1 | 38.1 | 34.7 | 96.8 | 26.5 | 59.2 | 6.1 |
| Mining | - .8 | 2.7 | 2.8 | 2.8 | 1.6 | 3.1 | 6.6 |
| Manufacturing | .1 | 2.0 | 7.5 | 1.8 | 1.5 | 2.9 | 2.4 |
| Durables | .2 | 1.9 | 2.1 | 2.6 | 1.4 | 4.1 | 1.3 |
| Non-durables | - .1 | 2.2 | 10.6 | 1.3 | 1.8 | 2.1 | 4.1 |
| Construction | - 3.8 | 9.5 | 15.4 | 8.5 | 8.4 | 14.1 | 2.8 |
| Transportation, communication and other utilities | .1 | 2.8 | 3.6 | - .7 | 2.2 | 3.0 | - .9 |
| Trade | .1 | 1.0 | 1.9 | 1.6 | .6 | 0.9 | 0 |
| Finance, insurance and real estate | .3 | .6 | .3 | .7 | .5 | 0.9 | 0.1 |
| Service | .1 | 3.3 | 5.4 | 4.3 | 3.0 | 4.1 | 0.6 |
| Industrial Composite | - .4 | 2.9 | 6.2 | 2.8 | 2.5 | 3.7 | 1.3 |

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

(1) For other urban areas see Table 6.

A less than seasonal increase from April of 2.7 p.c. was reported in mining. The largest gain was in British Columbia partly as the result of the termination of an industrial dispute in metal mining. In Ontario, the gain was depressed by a relatively small advance in metals.

In non-durable goods manufacturing a 2.2 p.c. gain reflected increases in most components, especially in foods and beverages in the Atlantic and British Columbia. Employment was seasonally high in canning, particularly fish canning. Among other non-durables industries, percentage increases from last month were greatest in paper (mainly originating in pulp and paper), petroleum and coal, and miscellaneous manufacturing.

Durable goods manufacturing recorded a 1.9 p.c. gain this month as all major groups rose. The increase was seasonal in nature. Gains were largest in wood products (especially in sawmills in Quebec and the Prairies), in primary metals (Partly because of the end of a strike in smelting and refining in Quebec), in non-metallic minerals and in metal fabricating. In metal fabricating there was a 12.2 p.c. gain in the Prairie Region which, along with a 7.6 p.c. rise in wood products, accounted for the above average increase in that region.

AVERAGE WEEKLY WAGES AND SALARIES

The table below shows that changes from April in average weekly wages and salaries were generally small and counter-balancing. The largest changes were in forestry where, month-to-month fluctuations in earnings as well as in employment are usually large.

Excluding forestry, the largest change from last month in the Canada averages of weekly wages and salaries was a \$1.12 gain in construction which occurred almost entirely in the building component. Regionally, the only decline in construction earnings was in Quebec where shorter hours were responsible for reduced weekly earnings in engineering.

Durable goods manufacturing reported average weekly wages and salaries that were slightly lower this month as decreases in machinery and transportation equipment offset a gain in primary metals, mainly in iron and steel mills in Ontario. The decline in transportation equipment partially reflected reduced average hours in the motor vehicles industries in Ontario. In machinery, earnings were lower in agricultural implements in Ontario and in miscellaneous machinery in Quebec. Smaller changes in other components were also offsetting in nature. Regionally, most components recorded declines in Ontario and British Columbia and gains in the Prairies and Quebec. Changes in the component Atlantic industries were more mixed with decreases in wood products and transportation equipment predominating.

Little change from last month was reported in non-durables as the effect of higher earnings in Quebec and the Prairie Region was balanced by declines in British Columbia and the Atlantic Region. Most components reported reduced earnings with largest declines in knitting mills where the wages of piece-workers in Quebec were lower, in printing, in miscellaneous manufacturing, and in clothing. In the Atlantic Region and British Columbia, losses in food and beverages were partially the result of the seasonal increase of lower-paid canning employees.

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries, May 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1964 was 68.1 per cent of all manufacturing employees reported in the Employment Section's survey. In mining the hourly-paid wage-earners represented 71.4 p.c. of reported employment and in construction 77.9 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

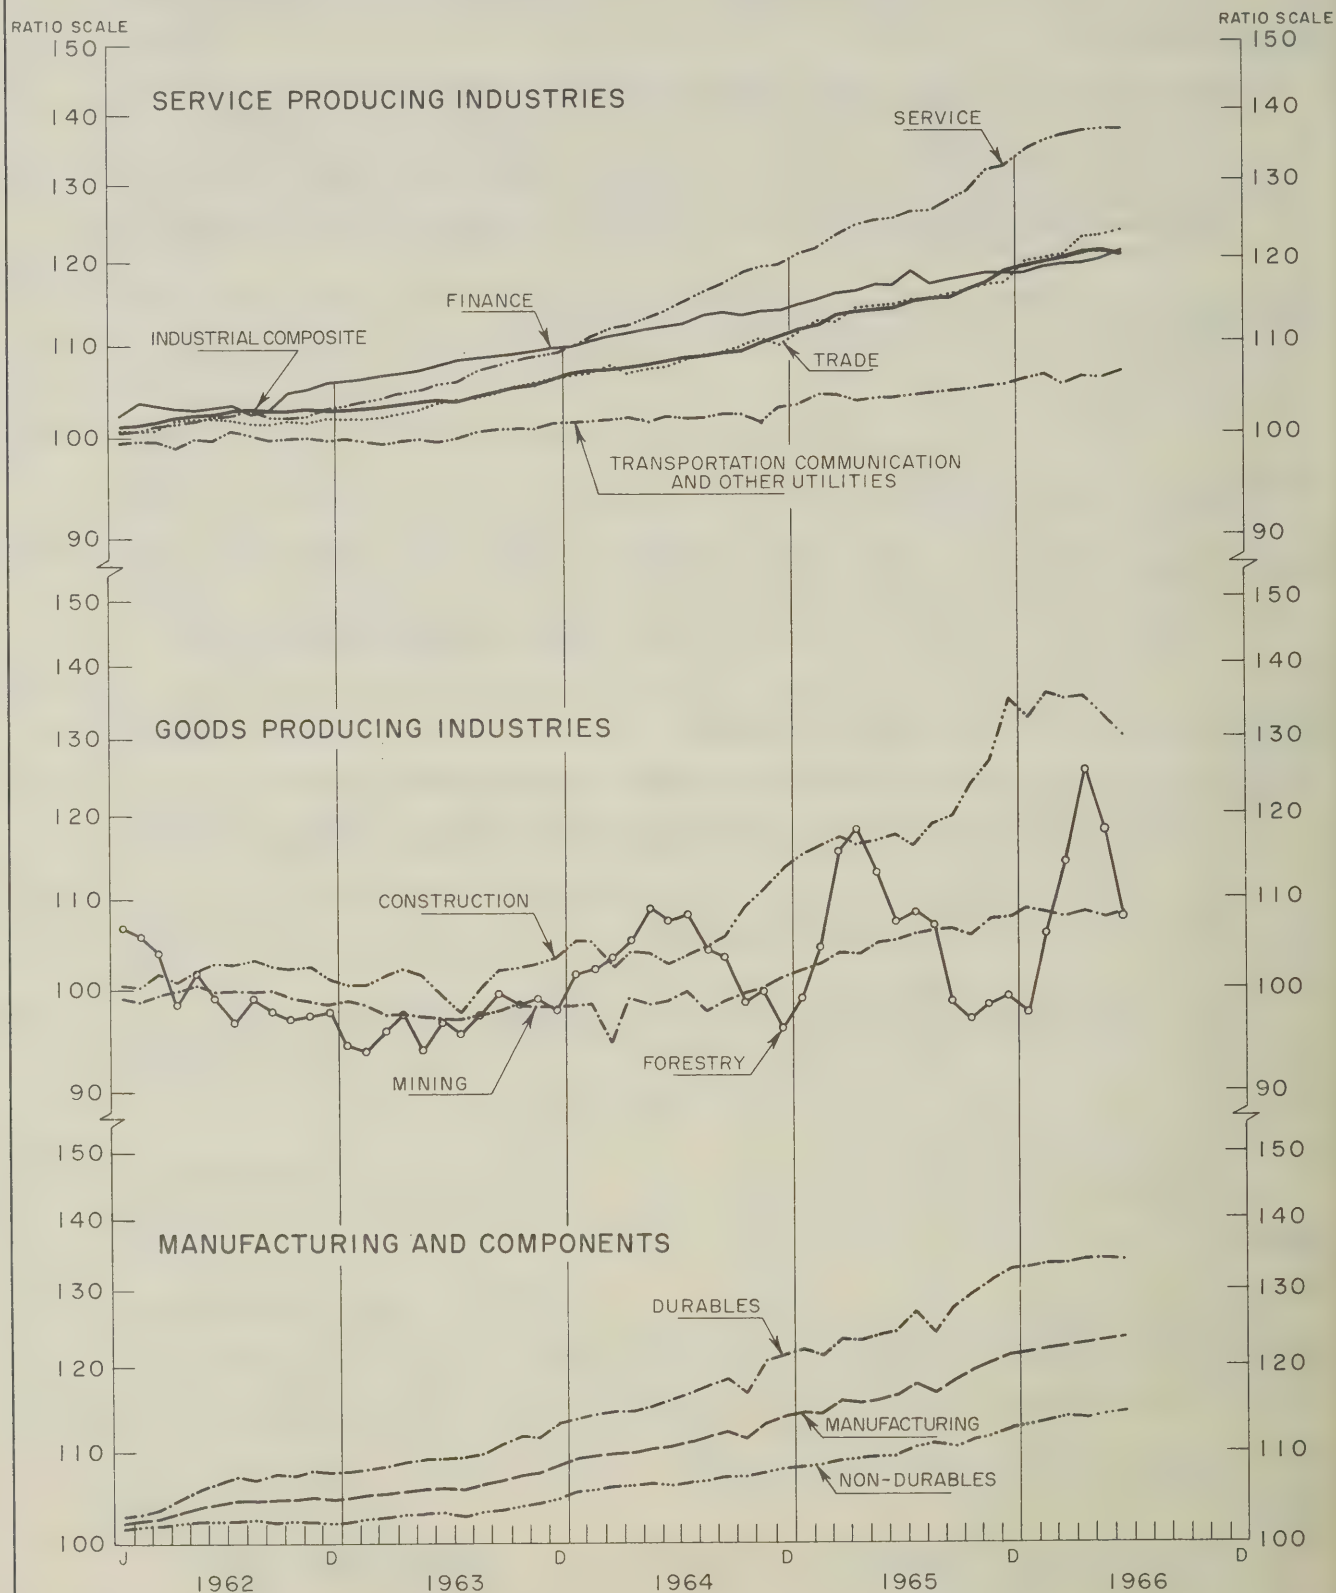

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

JUNE 1966

EMPLOYMENT

The unadjusted composite index of employment (1961=100) rose 3.0 p.c. from 120.3 in May to 123.9 in June and was 6.2 p.c. higher than in June of last year. Seasonally-adjusted, the index fell 0.3 p.c. from last month to 120.6.

Seasonally-adjusted employment indexes. - In manufacturing, the index showed little change from May as a slight decline in durables was offset by an increase in non-durables. Forestry and construction recorded declines, as employment increases were below average for this time of year. All other industry divisions showed small changes. Among the regions, changes from last month were also small.

The footnotes to the tables below indicate the most important factors underlying the larger variations from last month.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and Unadjusted Employment Index Numbers, June 1966

| Industry | Seasonally-adjusted | Unadjusted for seasonal variation | | | | | |
|---|---------------------|-----------------------------------|-----------------|---------|---------|----------------|------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | - 8.5(2) | 24.7(2) | 80.7 | 30.9 | 13.3 | 23.9 | - 1.9(3) |
| Mining | .4 | 3.9 | 2.0 | 4.5 | 3.1 | 5.4(4) | 3.9 |
| Manufacturing | .1 | 2.1 | 4.3 | 1.8 | 2.0 | 2.4 | 2.9 |
| Durables | - .1 | 1.5 | 2.7 | 1.6 | 1.3 | 2.6 | 1.8 |
| Primary metal | | 1.3 | 2.3 | 2.5 | .9 | (1) | 2.6 |
| Metal fabricating | | 1.7 | - .6 | .1 | 2.5 | 1.8 | 1.3 |
| Transportation equipment | | - .6 | - 2.7 | .6 | - 1.2 | (1) | 1.0 |
| Electrical products | | 2.2 | (1) | 1.0 | 2.5 | (1) | (1) |
| Non-durables | .3 | 2.7 | 5.1 | 1.9 | 3.0 | 2.3 | 4.5 |
| Food and beverages | | 5.3 | 8.0(5) | 3.2 | 5.7(6) | 3.4 | 9.5(7) |
| Textiles | | .8 | (1) | 1.2 | .6 | (1) | (1) |
| Clothing | | 1.3 | (1) | 1.1 | 1.6 | 1.1 | (1) |
| Paper | | 3.0 | 4.0 | 3.6 | 2.4 | (1) | 2.5 |
| Chemicals | | 1.0 | (1) | - .1 | 2.6 | (1) | 1.6 |
| Construction | - 1.7 | 5.4 | 8.9 | 2.9 | 5.9 | 8.4(8) | 3.2 |
| Building | | 4.5 | 7.1 | 3.0 | 4.3 | 7.0 | 2.0 |
| Engineering | | 7.0 | 12.8(9) | 2.6 | 9.4 | 8.9 | 4.7 |
| Transportation, Communication and other utilities | .6 | 3.3 | 3.9 | 5.7 | 2.3 | 2.4 | 1.4 |
| Transportation | | 4.3 | 4.9 | 8.1(10) | 5.0 | 3.3 | 1.8 |
| Communication | | 1.0 | .7 | 1.3 | 1.0 | .4 | 1.9 |
| Trade | .6 | 1.7 | 2.2 | 1.2 | 2.0 | 1.6 | 1.5 |
| Finance, insurance and real estate | 1.1 | 1.2 | 1.0 | .8 | 1.7 | 1.3 | .8 |
| Service | - .1 | 3.4 | 4.3 | .7 | 4.1 | 6.7(11) | 2.8 |
| Industrial composite | - .3 | 3.0 | 6.3 | 2.9 | 2.5 | 3.5 | 2.1 |

(1) Relatively few employees in this Region.

(2) This industry is subject to large irregular and seasonal fluctuations.

(3) Industrial dispute in logging.

(4) Arose mainly in petroleum contract drilling.

(5) Seasonal increase in fishing.

(6) Arose mainly as a result of seasonal increases in employment in fruit and vegetable processing and dairy products, and the settlement of industrial dispute in slaughtering and meat processing.

(7) Seasonal increase in the fish industry and in fruit and vegetable processing.

(8) Seasonal increase in all component industries.

(9) Seasonal increase, chiefly in the highways, bridges and streets component.

(10) The result of the settlement of an industrial dispute in water transport and services.

(11) Seasonal increase in the hotels, restaurants and taverns component.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported June 1966 |
|--|---------------|----------|-----------|-----------|----------|-----------|-----------------------------------|----------|-----------|---------------------------------|
| | Employment | | | Payrolls | | | | | | |
| | June 1966 | May 1966 | June 1965 | June 1966 | May 1966 | June 1965 | June 1966 | May 1966 | June 1965 | |
| INDUSTRY DIVISION | 1961=100 | | | | | | dollars | | | number |
| Forestry | 120.3 | 96.4 | 119.3 | 161.0 | 125.3 | 140.9 | 97.96 | 101.83 | 92.60 | 68,601 |

(1) For other urban areas see Table 6.

AVERAGE WEEKLY WAGES AND SALARIES

Average weekly wages and salaries at the industrial composite level at \$95.99 showed no change from last month. Decreases in forestry, construction, manufacturing and mining were offset by increases in the other industry divisions. Regionally, average weekly wages and salaries showed little change from last month.

The latest composite figure was \$5.11 above June last year. In the year-over-year comparison, the largest industrial gain was in construction (\$12.91) and the largest regional increase in Quebec (\$6.47).

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries, June 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
|---|------------|-----------------|-----------|-----------|----------------|------------------|
| dollars | | | | | | |
| Forestry | - 14.95(2) | - 3.44 | 7.32 | 10.19 | - 5.31 | - 13.36 |

| Service | .59 | - .08 | 2.13(11) | - .01 | .32 | .50 |
| Industrial composite | - | - .01 | - .12 | .08 | .82 | - .70 |

- (1) Relatively few employees in this Region.
- (2) The decline in the Canada average is greater than any regional decline, reflecting a large increase in employment in the Atlantic region, where wages are below average, and a decrease in British Columbia, where they are above average.
- (3) Arising mainly in the metal mines component.
- (4) Largely the result of an industrial dispute in wood products.
- (5) Increase in weekly hours worked.
- (6) Decrease in hours associated with preparation for the model changeover in the motor vehicles component.
- (7) Arose mainly in the shipbuilding and repair component.
- (8) Short-time, associated with the observing of St. John Baptiste Day in Quebec.
- (9) Seasonal increase in hours worked.
- (10) Less overtime worked in June.
- (11) Arose mainly in the irregular business services component.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of the reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|-----------------------|-------------|---------------------|---------------------------|---------------------|------------------|---------------------|---------------|---------------------|-------------------|---------------------|--------------|---------------------|
| | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | All manufactures | | Durable goods | | Non-durable goods | | Un-adjusted | Seasonally-adjusted |
| | | | | | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | | |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1964 was 68.1 per cent of all manufacturing employees reported in the Employment Section's survey. In mining the hourly-paid wage-earners represented 71.4 p.c. of reported employment and in construction 77.9 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

- (1) Relatively few employees in this region.
- (2) This industry is subject to large irregular and seasonal fluctuations.
- (3) Industrial dispute in nickel - copper.
- (4) Industrial dispute in smelting and refining.
- (5) Model-changeover in the automobile industries.
- (6) Seasonal increase in canning.
- (7) Industrial dispute in filament yarn and staple fibres.
- (8) Partly the result of a strike in pharmaceuticals.
- (9) Many firms in all components reported more employees.
- (10) Arose mainly in municipal recreational services.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industrial composite | .57 | - .12 | .99 | .30 | .71 | 1.15 |

- (1) Relatively few employees in this region.
- (2) Reduced average weekly hours last month because of an industrial dispute.
- (3) Reduced average weekly hours in mineral fuels.
- (4) Partly the result of wage-increases in nickel - copper and longer average weekly hours.
- (5) Short time in wood products last month because of an industrial dispute in saw mills.
- (6) More overtime in smelting and refining.
- (7) Longer average weekly hours.
- (8) Reduction in average weekly hours in shipbuilding.
- (9) Reduced overtime payments.
- (10) Scattered wage increases, larger overtime payments.
- (11) Lower average weekly hours in pulp and paper mills.
- (12) Partly because of higher average weekly hours in industrial chemicals.
- (13) Short time last month, associated with the observing of St. Jean Baptiste Day in Quebec.
- (14) Increase of lower paid employees in other recreational services.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|-----------------------|-----------------|-----------------------------------|---------------------------------|-----------------------------------|---------------------|-----------------------------------|-----------------|-----------------------------------|----------------------|-----------------------------------|-----------------|-----------------------------------|
| | | | | | All manufactures | | Durable goods | | Non-durable goods | | | |
| | Un- adjusted | Season- ally- ad- justed | Un- adjusted | Season- ally- ad- justed | Un- adjusted | Season- ally- ad- justed | Un- adjusted | Season- ally- ad- justed | Un- adjusted | Season- ally- ad- justed | Un- adjusted | Season- ally- ad- justed |

(1) Table will be completed in subsequent publications as data become available.

P Preliminary figures.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), WITH UNADJUSTED INDEX NUMBERS CANADA, GOODS PRODUCING INDUSTRIES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA SERVICE PRODUCING INDUSTRIES AND INDUSTRIAL COMPOSITE

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), WITH UNADJUSTED INDEX NUMBERS, ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

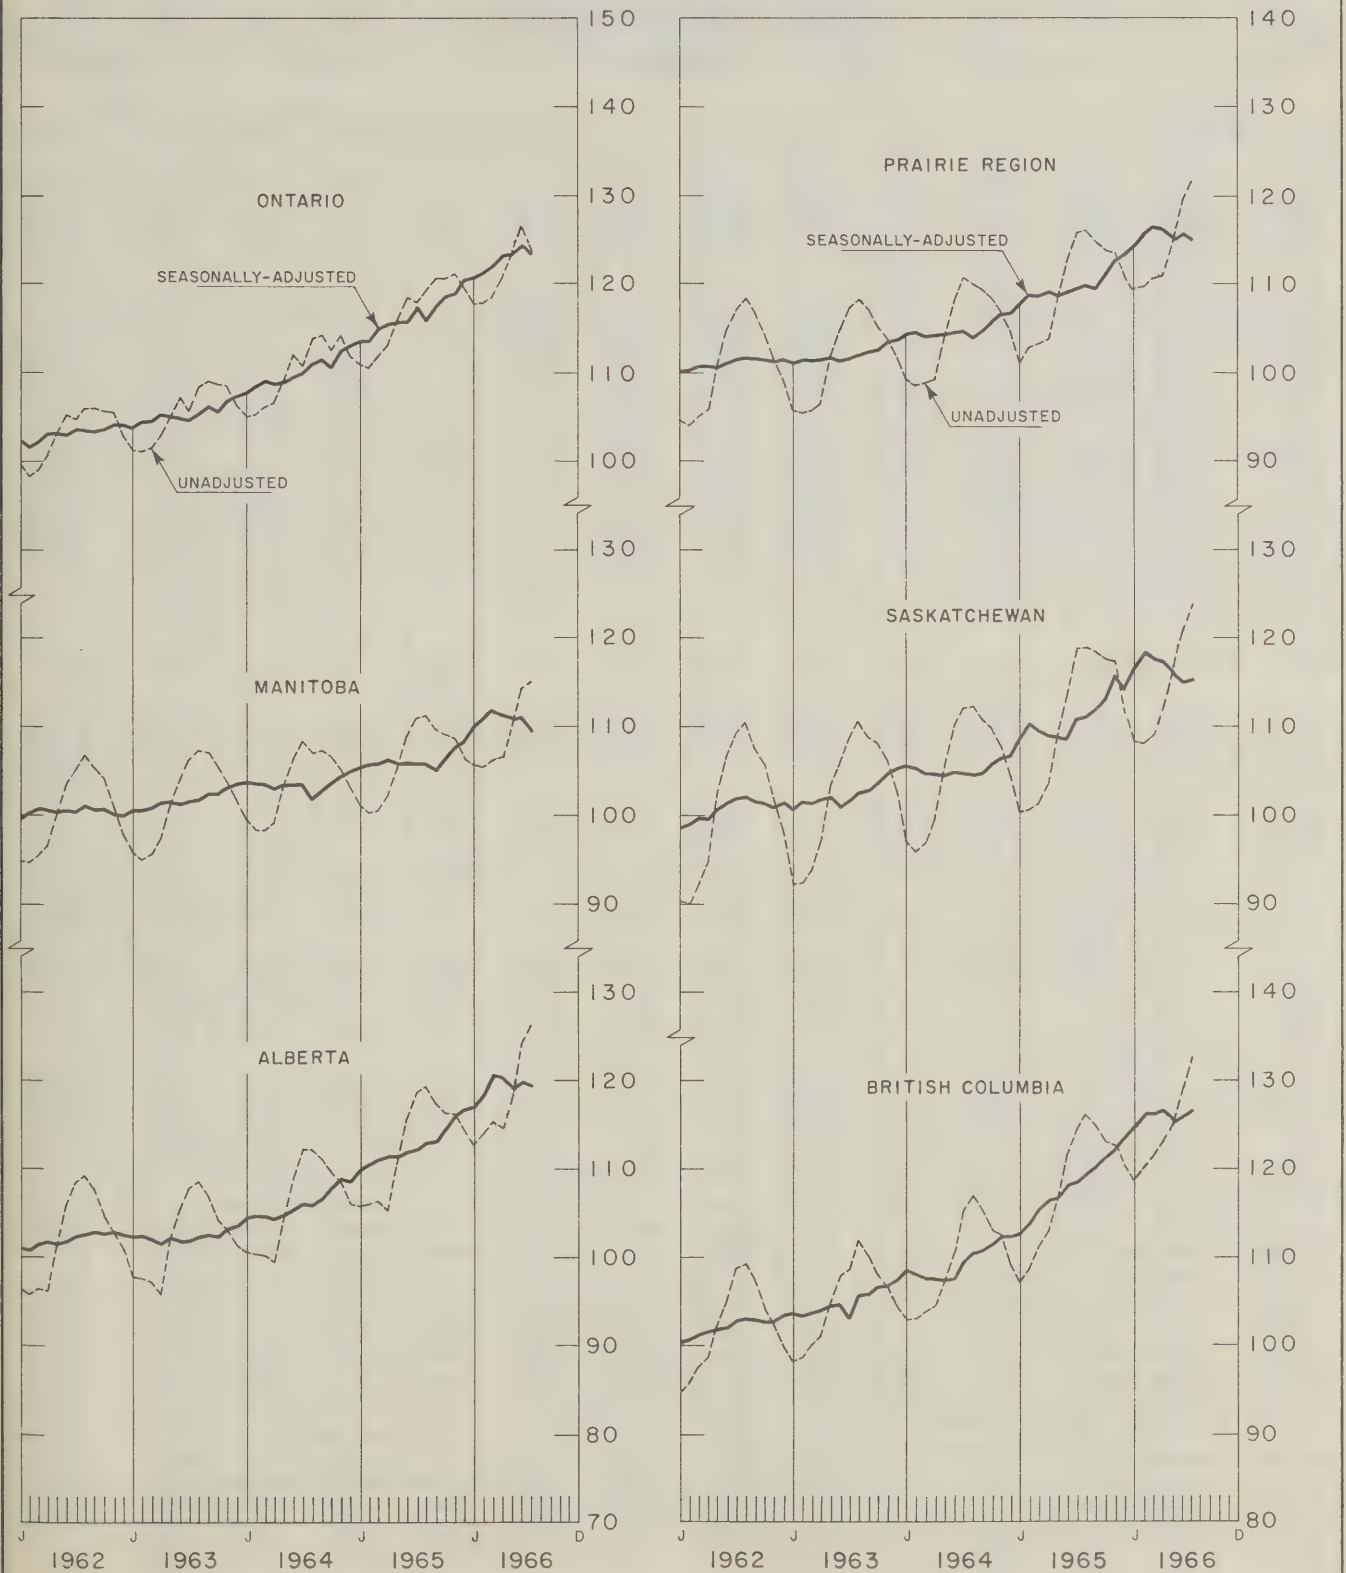

TABLE 4. Employment and Average Weekly Wages and Salaries, by Industry, for Canada

| S.I.C. Code | Industry | Employment indexes | | | | Average weekly wages and salaries | | | | Employees reported July 1966 |

(1) Table will be completed as data become available.
(2) Subject to revision.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages(1)

| Industry | Canada | Nfld. | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. |

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

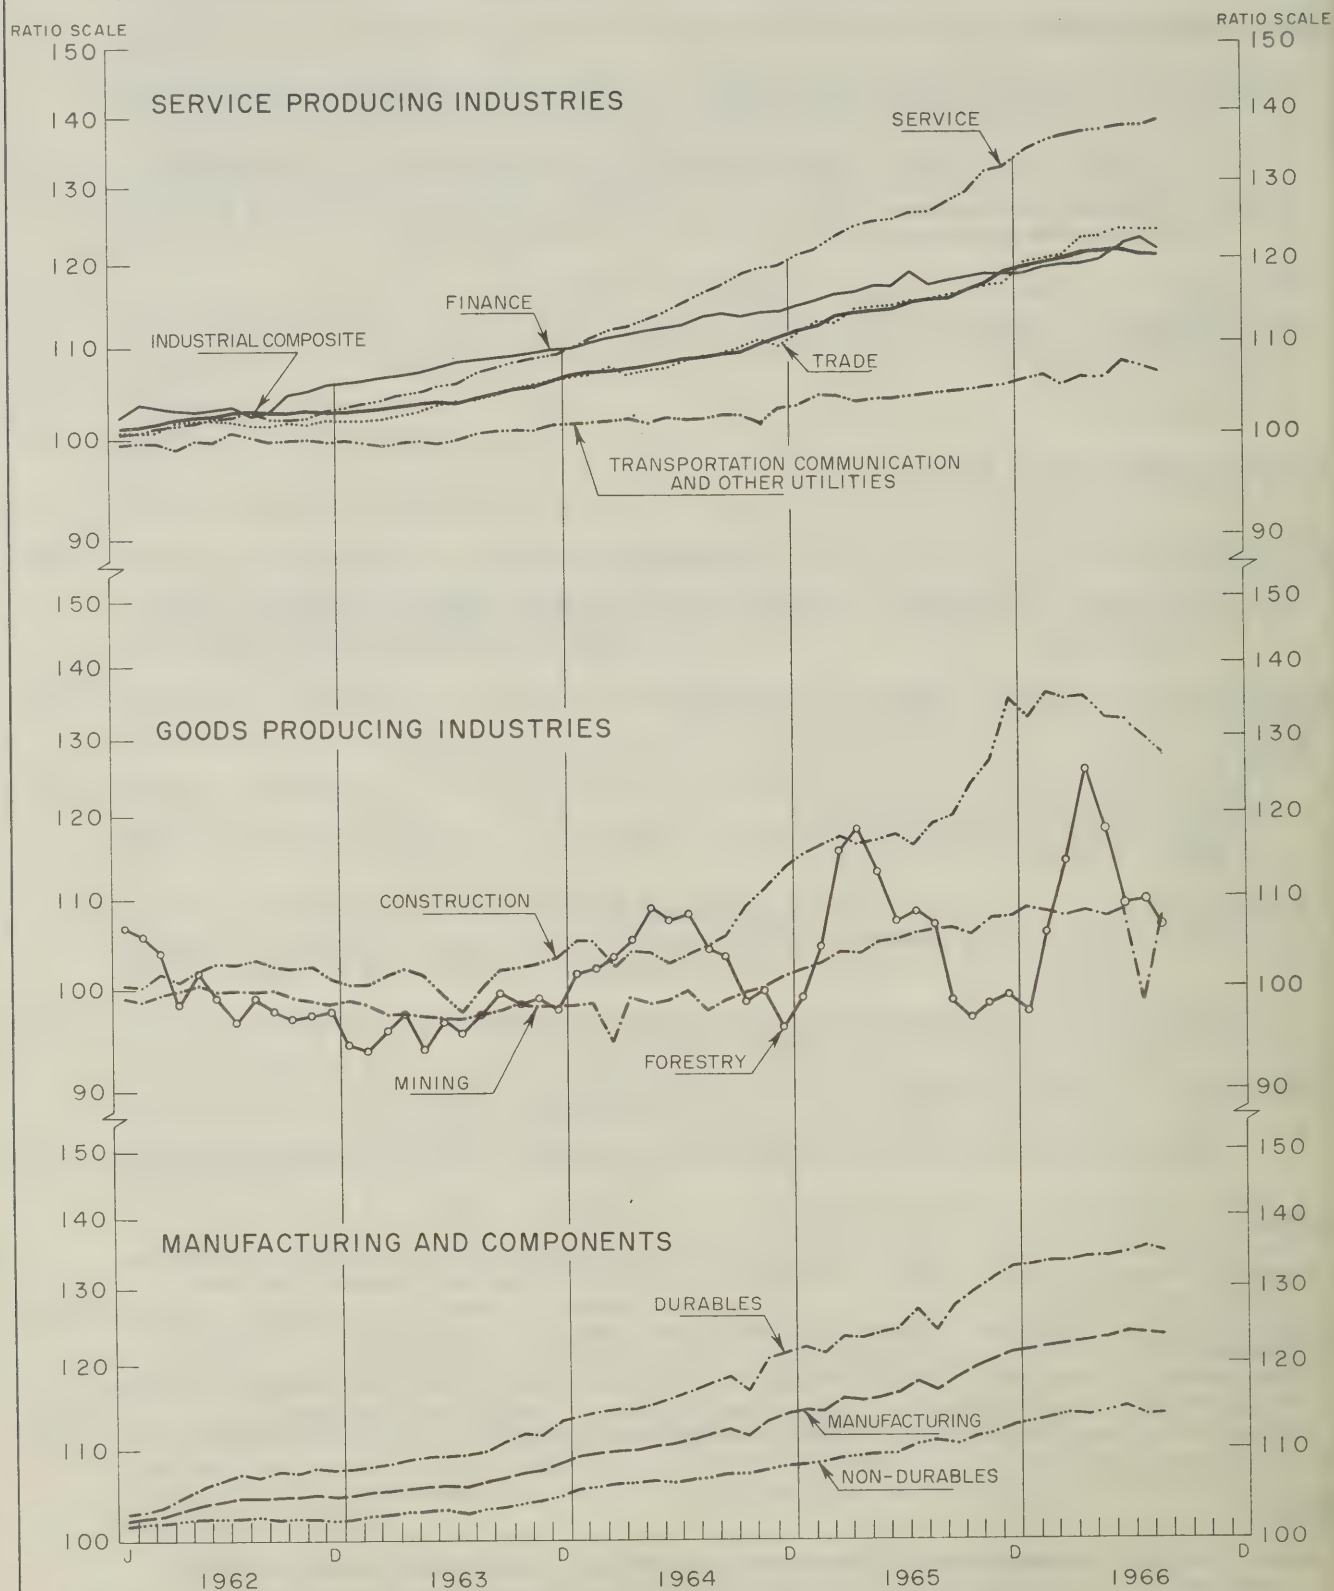

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

AUGUST 1966

EMPLOYMENT

The seasonally-adjusted employment index (1961=100) fell 0.1 p.c. from 120.5 last month to 120.4. In manufacturing, the adjusted index fell 0.1 p.c. from July as an increase in non-durables was more than offset by a decline in durables. All other industry divisions recorded declines, except mining and service. The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted
and Unadjusted Employment Index Numbers, August 1966

| Industry | Season- ally-ad- justed | Unadjusted for seasonal variation | | | | | |
|--|-------------------------------|-----------------------------------|-----------|--------------------|---------|-----------|-------------------|
| | | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region |
| Forestry | - 2.9 | - 1.4 | - 2.8 | 3.5 | 5.3 | - 35.2(2) | - 0.2 |
| Mining | 9.0 | 8.2 | 2.4 | 0.3 | 31.9(3) | 0.4 | 1.1 |
| Manufacturing | - 0.1 | 2.5 | 1.2 | 1.8 | 3.6 | 0.6 | 0.4 |
| Durables | - 0.4 | 2.7 | 1.8 | 2.2 | 3.9 | -- | - 1.2 |

| Chemicals | | 1.0 | (1) | 1.1 | 0.9 | (1) | - 1.0 |
| Construction | - 1.9 | - 0.7 | - 2.1 | - 0.2 | 1.6 | 0.6 | - 12.1 |
| Building | | - 2.0 | - 3.1 | - 0.6 | 2.2 | - 0.1 | - 28.7(11) |
| Engineering | | 1.5 | -- | 0.6 | 0.4 | 1.7 | 8.3(12) |
| Transportation, communication and other utilities | - 0.7 | - 0.2 | - 2.6 | 0.5 | 0.3 | - 0.6 | - 0.5 |
| Transportation | | - 0.1 | - 3.6(13) | 0.9 | 0.6 | - 0.4 | - 0.5 |
| Communication | | 0.4 | - 0.5 | - 0.6 | - 0.4 | - 0.3 | -- |
| Trade | - 0.2 | 0.2 | - 0.2 | 0.6 | 0.1 | 0.8 | - 0.8 |
| Finance, insurance and real estate | - 0.9 | -- | 0.1 | 0.3 | - 0.2 | -- | 0.2 |
| Service | 0.6 | 2.1 | 2.1 | 1.8 | 2.6 | -- | 4.0(14) |
| Industrial composite | - 0.1 | 1.4 | - 0.4 | 1.2 | 2.7 | - 0.2 | - 0.6 |
| <u>Adjusted for seasonal variation</u> | | | | | | | |
| Industrial composite | | - 0.1 | - 1.1 | - 0.1 | 0.5 | -- | 1.4 |

- (1) Relatively few employees in this region.
- (2) Seasonal decrease in the forestry services component.
- (3) Settlement of an industrial dispute in the nickel-copper component.
- (4) Mainly in the iron and steel mills component.
- (5) Settlement of an industrial dispute in smelting and refining.
- (6) Partial return to work after the model changeover in motor vehicle manufacturing and parts and accessories.
- (7) Mainly in the shipbuilding and repair component.
- (8) Vacation layoff last month in major appliances.
- (9) Seasonal increase in fruit and vegetable canning.
- (10) Seasonal increase.
- (11) Industrial dispute.
- (12) Mainly in the general engineering contractors component.
- (13) Seasonal decline in highway and bridge maintenance and stevedoring.
- (14) Pacific National Exhibition.
- No change from last month.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported August 1966 |
|---|---------------|-----------|-----------|-----------|-----------|-----------|-----------------------------------|-----------|-----------|--------------------------------|
| | Employment | | | Payrolls | | | | | | |
| | Aug. 1966 | July 1966 | Aug. 1965 | Aug. 1966 | July 1966 | Aug. 1965 | Aug. 1966 | July 1966 | Aug. 1965 | |
| | 1961=100 | | | | | | dollars | | | number |

(1) For other urban areas see Table 6.

AVERAGE WEEKLY WAGES AND SALARIES

Average weekly wages and salaries at the industrial composite level fell \$2.11 from \$96.67 in July to \$94.56 in August. The decrease was largely attributable to the industrial dispute in railways, which began in the later part of the reference week and resulted in a \$16.51 decline in transportation, communication and other utilities. All other industry divisions recorded increases except service and trade, where there were slight declines.

- (1) Relatively few employees in this region.
- (2) Decrease in the employment of lower paid workers in the forestry services component.
- (3) Short time last month in the coal mines component.
- (4) Mainly in the nickel-copper component.
- (5) More hours and vacation bonuses in iron and steel mills.
- (6) Seasonal decrease in hours worked.
- (7) Increase in employment following the model changeover in higher paid motor vehicles manufacturing.
- (8) Overtime in communications equipment, wage increase in miscellaneous electrical products.
- (9) Seasonal increase in employment of lower paid workers in fruit and vegetable canning.
- (10) Shorter average hours associated with an industrial dispute.
- (11) The result of an industrial dispute in the railways component.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|---------------------|-------------|---------------------|---------------------------|---------------------|------------------|---------------------|---------------|---------------------|-------------------|---------------------|--------------|---------------------|
| | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | All manufactures | | Durable goods | | Non-durable goods | | Un-adjusted | Seasonally-adjusted |
| | | | | | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | | |

(1) Table will be completed in subsequent publications as data become available.

(2) Subject to revision.

AVERAGE WEEKLY WAGES AND SALARIES, URBAN AREAS INDUSTRIAL COMPOSITE

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages(1)

| Industry | Canada | Nfld. | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. |

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

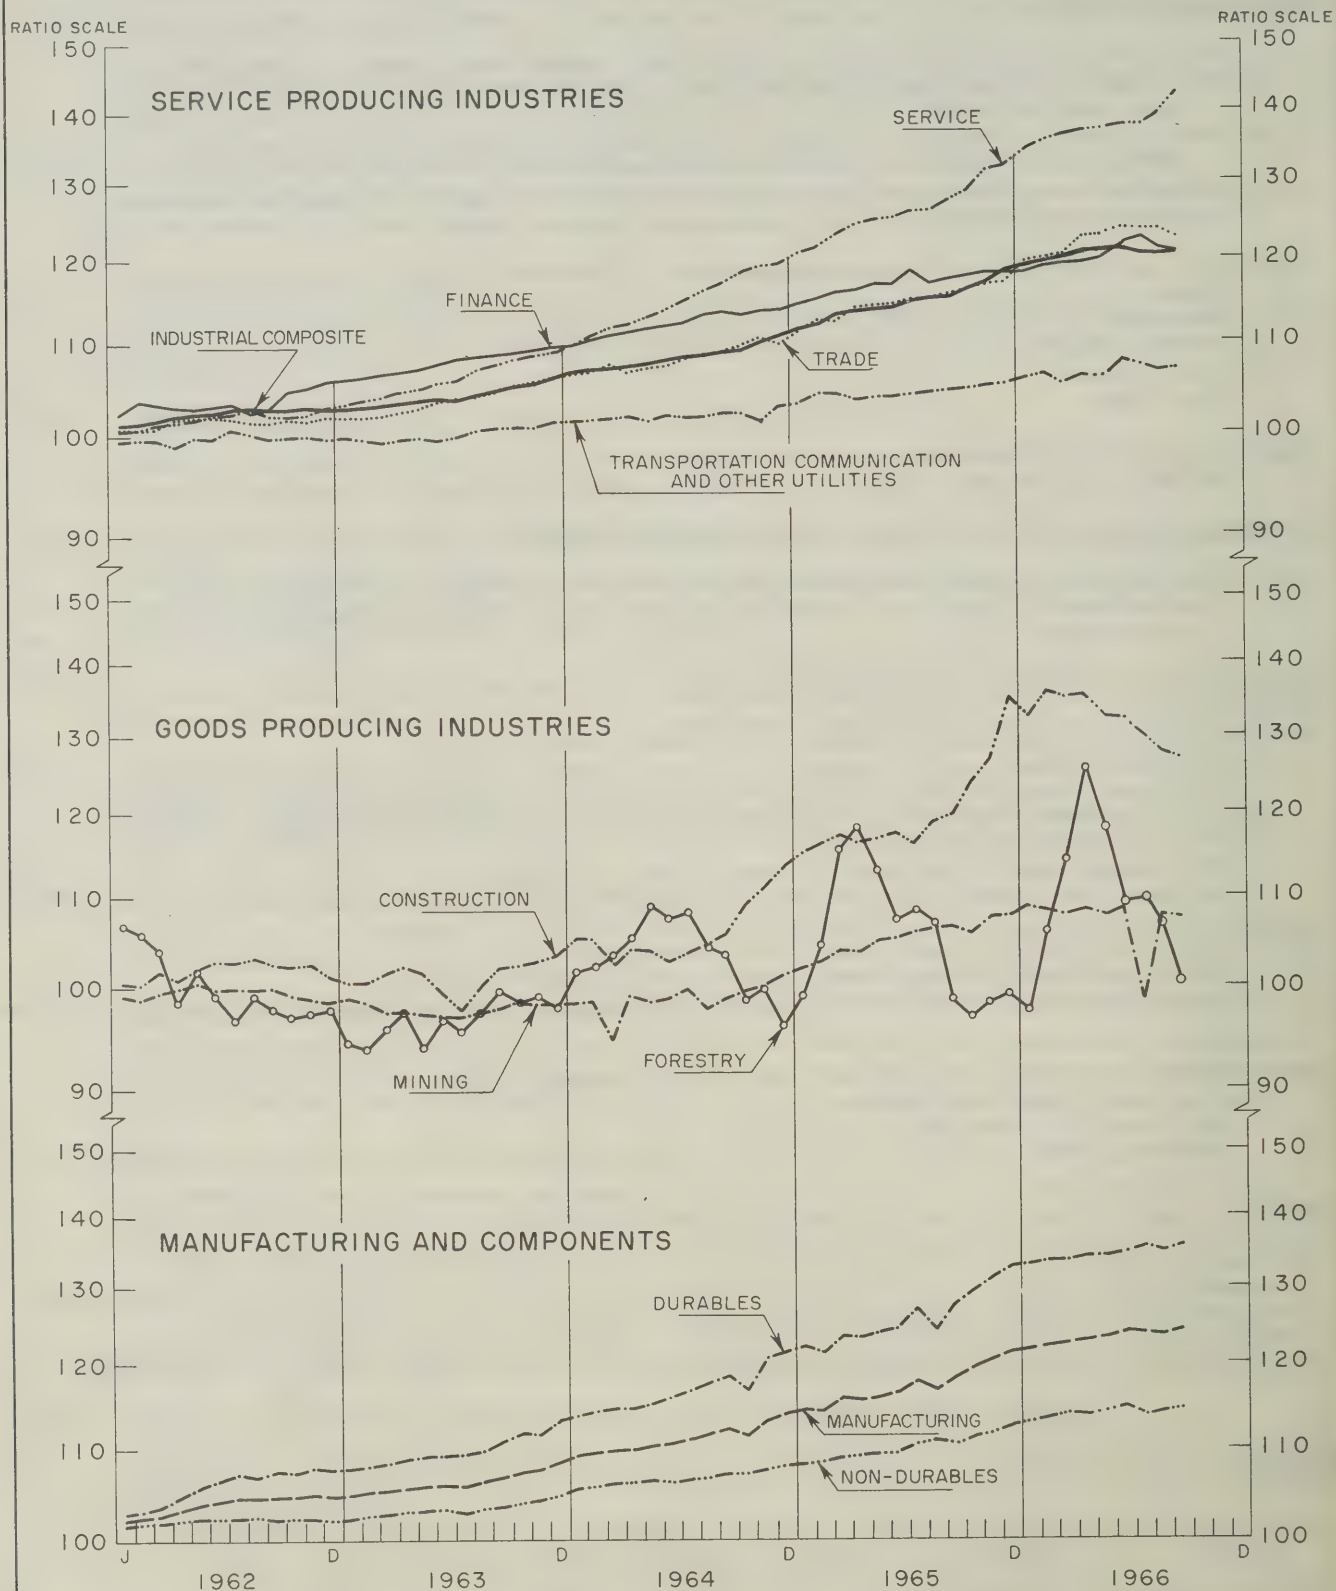

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

SEPTEMBER 1966

EMPLOYMENT

The seasonally-adjusted employment index (1961=100) at 120.7 in September showed little change from 120.5 in August. Industrial changes were generally small, the largest fluctuations being in forestry where there was a 4.7 p.c. decline, and in service, where there was a 2.2 p.c. advance. The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted
and Unadjusted Employment Index Numbers, September 1966

| Industry | Seasonally adjusted | Unadjusted for seasonal variation | | | | | |
|--|------------------------|-----------------------------------|--------------------|----------|----------|-------------------|---------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |

| <u>Adjusted for seasonal variation</u> | | | | | | | |
| Industrial composite | | 0.2 | - 0.4 | 0.5 | - 0.1 | - 0.6 | -- |

(1) Relatively few employees in this region.

(2) Seasonal decrease in forestry services.

(3) Mainly in mining services and copper-gold-silver mines.

(4) Seasonal decline in saw, shingle and planing mills.

(5) Layoff last month associated with the model change-over in the automotive industries.

(6) Seasonal declines in canning.

(7) Settlement of industrial disputes in cotton yarn and cloth and in synthetic textiles.

(8) Settlement of an industrial dispute.

(9) Layoffs in highways.

(10) Industrial dispute in railways.

(11) Closing of Pacific National Exhibition last month.

-- No change from last month.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported September 1966 |
|---|---------------|-----------|------------|------------|-----------|------------|-----------------------------------|-----------|------------|-----------------------------------|
| | Employment | | | Payrolls | | | | | | |
| | Sept. 1966 | Aug. 1966 | Sept. 1965 | Sept. 1966 | Aug. 1966 | Sept. 1965 | Sept. 1966 | Aug. 1966 | Sept. 1965 | |

(1) For other urban areas see Table 6.

AVERAGE WEEKLY WAGES AND SALARIES

Average weekly wages and salaries rose \$4.29 from \$94.52 in August to \$98.81 in September. A large part of the increase was the result of the settlement of the industrial dispute which depressed earnings in transportation, communication and other utilities last month. All industry divisions recorded increased wages and salaries except trade where there was a slight decline.

- (1) Relatively few employees in this region.
- (2) Concentrated in logging.
- (3) Longer average hours in saw mills.
- (4) Overtime and wage increases in smelting and refining.
- (5) Shorter average hours in ship-building.
- (6) Increased overtime in pulp and paper mills.
- (7) Longer average hours.
- (8) Shorter average hours in general contractors.
- (9) Overtime in other engineering.
- (10) Increased average hours in railways associated with the settlement of the industrial dispute. The railway data are partly estimated and subject to revision next month.
- (11) As above, in the telegraph industry.
- (12) Reduction in number of lower paid employees because of the closing of the Pacific National Exhibition.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|---------------------|-------------|---------------------|---------------------------|---------------------|------------------|---------------------|---------------|---------------------|-------------------|---------------------|--------------|---------------------|
| | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | All manufactures | | Durable goods | | Non-durable goods | | Un-adjusted | Seasonally-adjusted |
| | | | | | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | Un-adjusted | Seasonally-adjusted | | |
| Average - 1957 | | | | | | | | | | | | |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages (1)

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours, for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-502 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

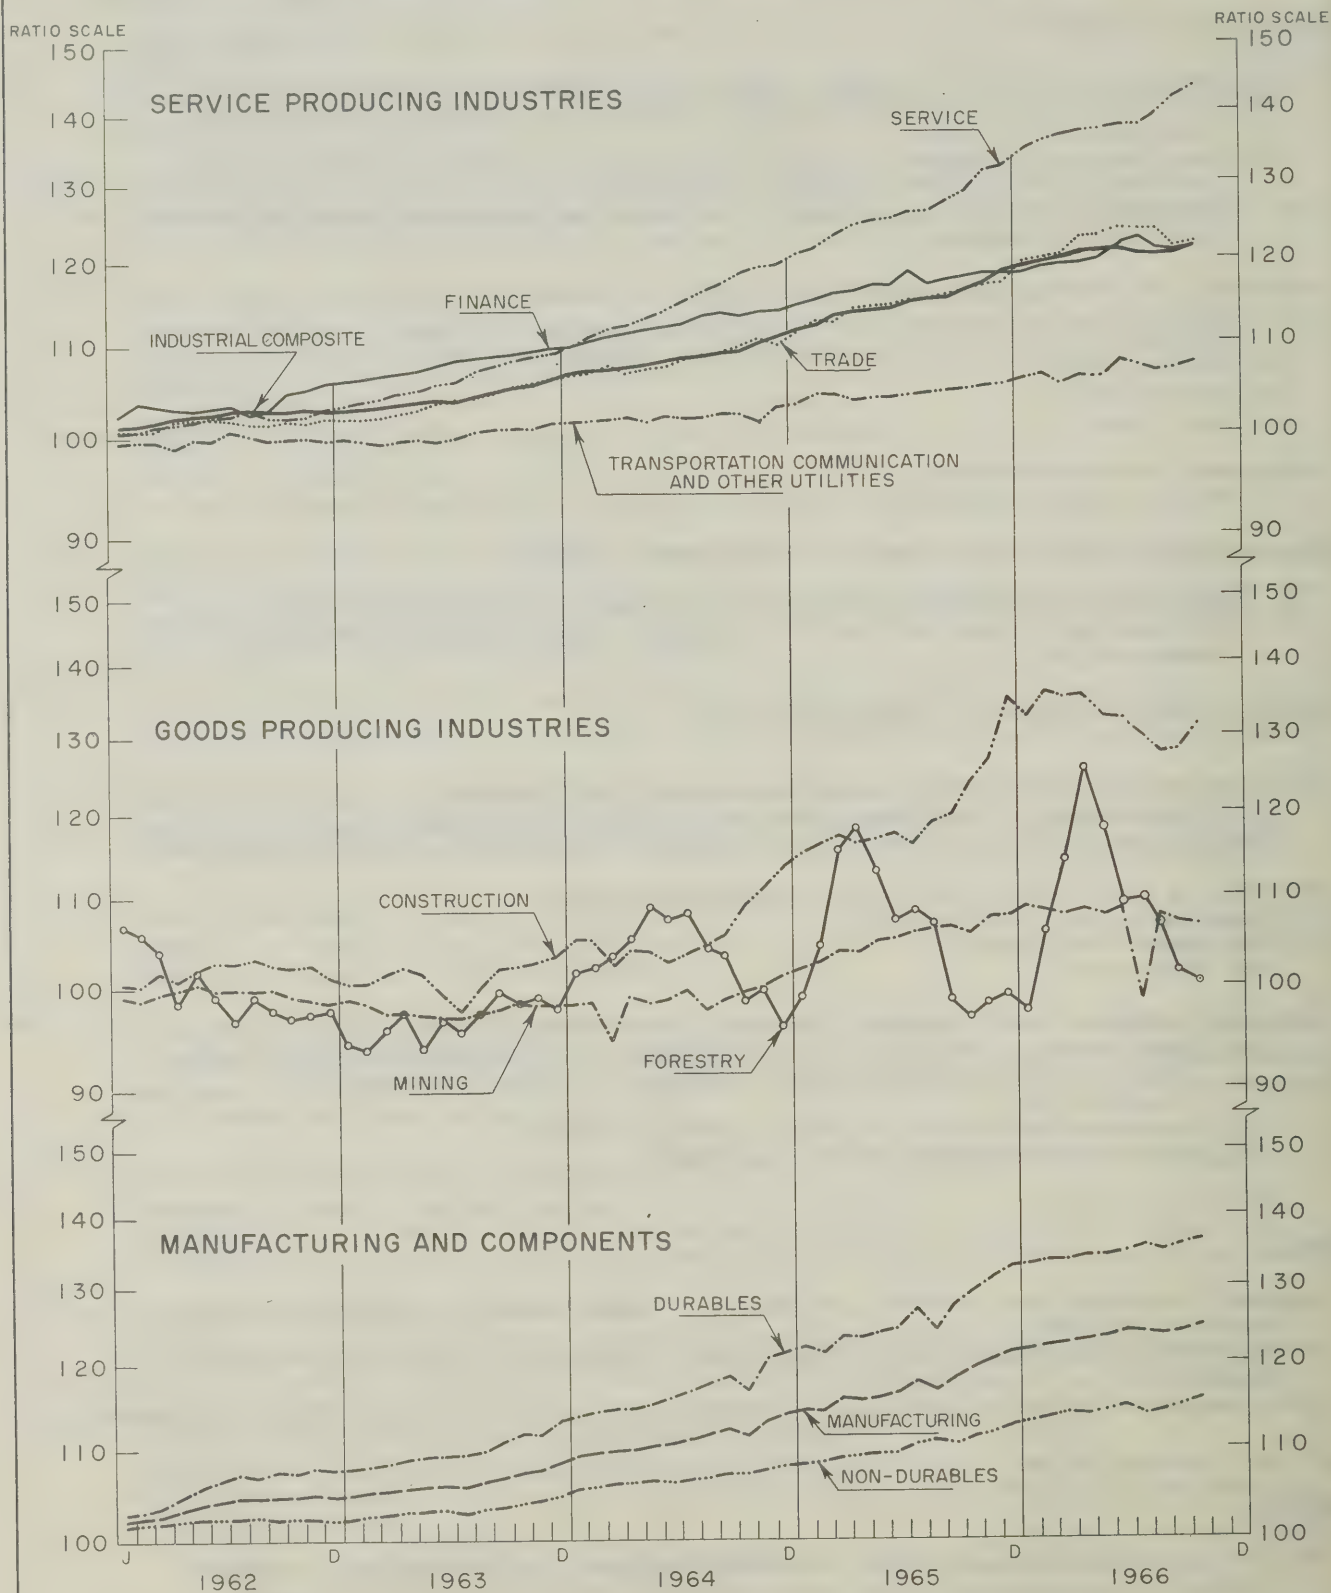

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

OCTOBER 1966

EMPLOYMENT

The unadjusted composite index of employment (1961=100) declined slightly from 124.7 in September to 124.1 in October and was 4.6 p.c. higher than in October of last year. Seasonally-adjusted, the index at 121.3 was 0.6 p.c. above last month's level. All industries recorded increased seasonally-adjusted indexes except mining and forestry where there were small declines. All regions shared in the increase with the largest gain in the Prairies (1.6 p.c.).

The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month.

Percentage Changes from last month in Selected Series of Seasonally-adjusted and
Unadjusted Employment Index Numbers, October 1966

| Industry | Season- | Unadjusted for seasonal variation | | | | | | |
|--|----------|-----------------------------------|-----------|--------------------|----------|-----------|-------------------|---------------------|

| Industrial composite | 0.6 | 0.4 | 0.5 | 0.6 | 1.6 | 0.9 |
|----------------------------|-----|-----|-----|-----|-----|-----|

- (1) Relatively few employees in this region.
- (2) No change from last month.
- (3) In forestry services.
- (4) Strike in metal mines.
- (5) Seasonal.
- (6) Layoffs in iron and steel mills.
- (7) Strike in iron and steel mills.
- (8) In shipbuilding and aircraft.
- (9) Seasonal movement in canning.
- (10) Settlement of industrial dispute.
- (11) In both components.
- (12) In department stores.
- (13) Seasonal decline in hotels.

TABLE 1. Summary Statistics of Employment, Payrolls and Average Weekly Wages and Salaries

| Industry division and area | Index numbers | | | | | | Average weekly wages and salaries | | | Employees reported October 1966 |
|---|---------------|------------|-----------|-----------|------------|-----------|-----------------------------------|------------|-----------|---------------------------------|
| | Employment | | | Payrolls | | | | | | |
| | Oct. 1966 | Sept. 1966 | Oct. 1965 | Oct. 1966 | Sept. 1966 | Oct. 1965 | Oct. 1966 | Sept. 1966 | Oct. 1965 | |
| | 1961=100 | | | | | | dollars | | | number |
| INDUSTRY DIVISION | | | | | | | | | | |
| Forestry | 122.1 | 126.4 | 118.6 | 168.9 | 175.6 | 154.1 | 108.39 | 108.94 | 101.88 | 69,713 |

AVERAGE WEEKLY WAGES AND SALARIES

Average weekly wages and salaries at \$99.37 in October were \$1.01 higher than in September and \$5.81 higher than in October of last year. There were increases from September in all industry divisions except forestry where there was a small decline. The largest gains were in construction (\$3.17) and in transportation, communication and other utilities (\$1.47). All regions had higher weekly wages and salaries with gains ranging from 33 cents in the Atlantic Region to \$1.24 in Ontario.

- (1) Relatively few employees in this region.
- (2) Seasonal.
- (3) Longer average hours in metals.
- (4) In saw, shingle mills.
- (5) Overtime and wage increases in iron and steel mills.
- (6) Shorter average hours in smelting and refining.
- (7) In shipbuilding.
- (8) More overtime in motor vehicle assembling.
- (9) Seasonal reduction in numbers of lower paid canning employees.
- (10) Less overtime in industrial chemicals.
- (11) Some wage increases and scattered overtime.
- (12) Longer hours, overtime payments, and wage increases.
- (13) Shorter average hours.
- (14) Scattered movements in many component industries.
- (15) Wage increases and overtime in telephones.
- (16) Seasonal decline in number of lower-paid hotel employees.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |

(1) Table will be completed in subsequent publications as data become available.

P Preliminary figures.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS
CANADA, GOODS PRODUCING INDUSTRIES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
CANADA SERVICE PRODUCING INDUSTRIES AND INDUSTRIAL COMPOSITE

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ATLANTIC REGION AND EASTERN PROVINCES

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100),
WITH UNADJUSTED INDEX NUMBERS,
ONTARIO, PRAIRIE REGION AND WESTERN PROVINCES

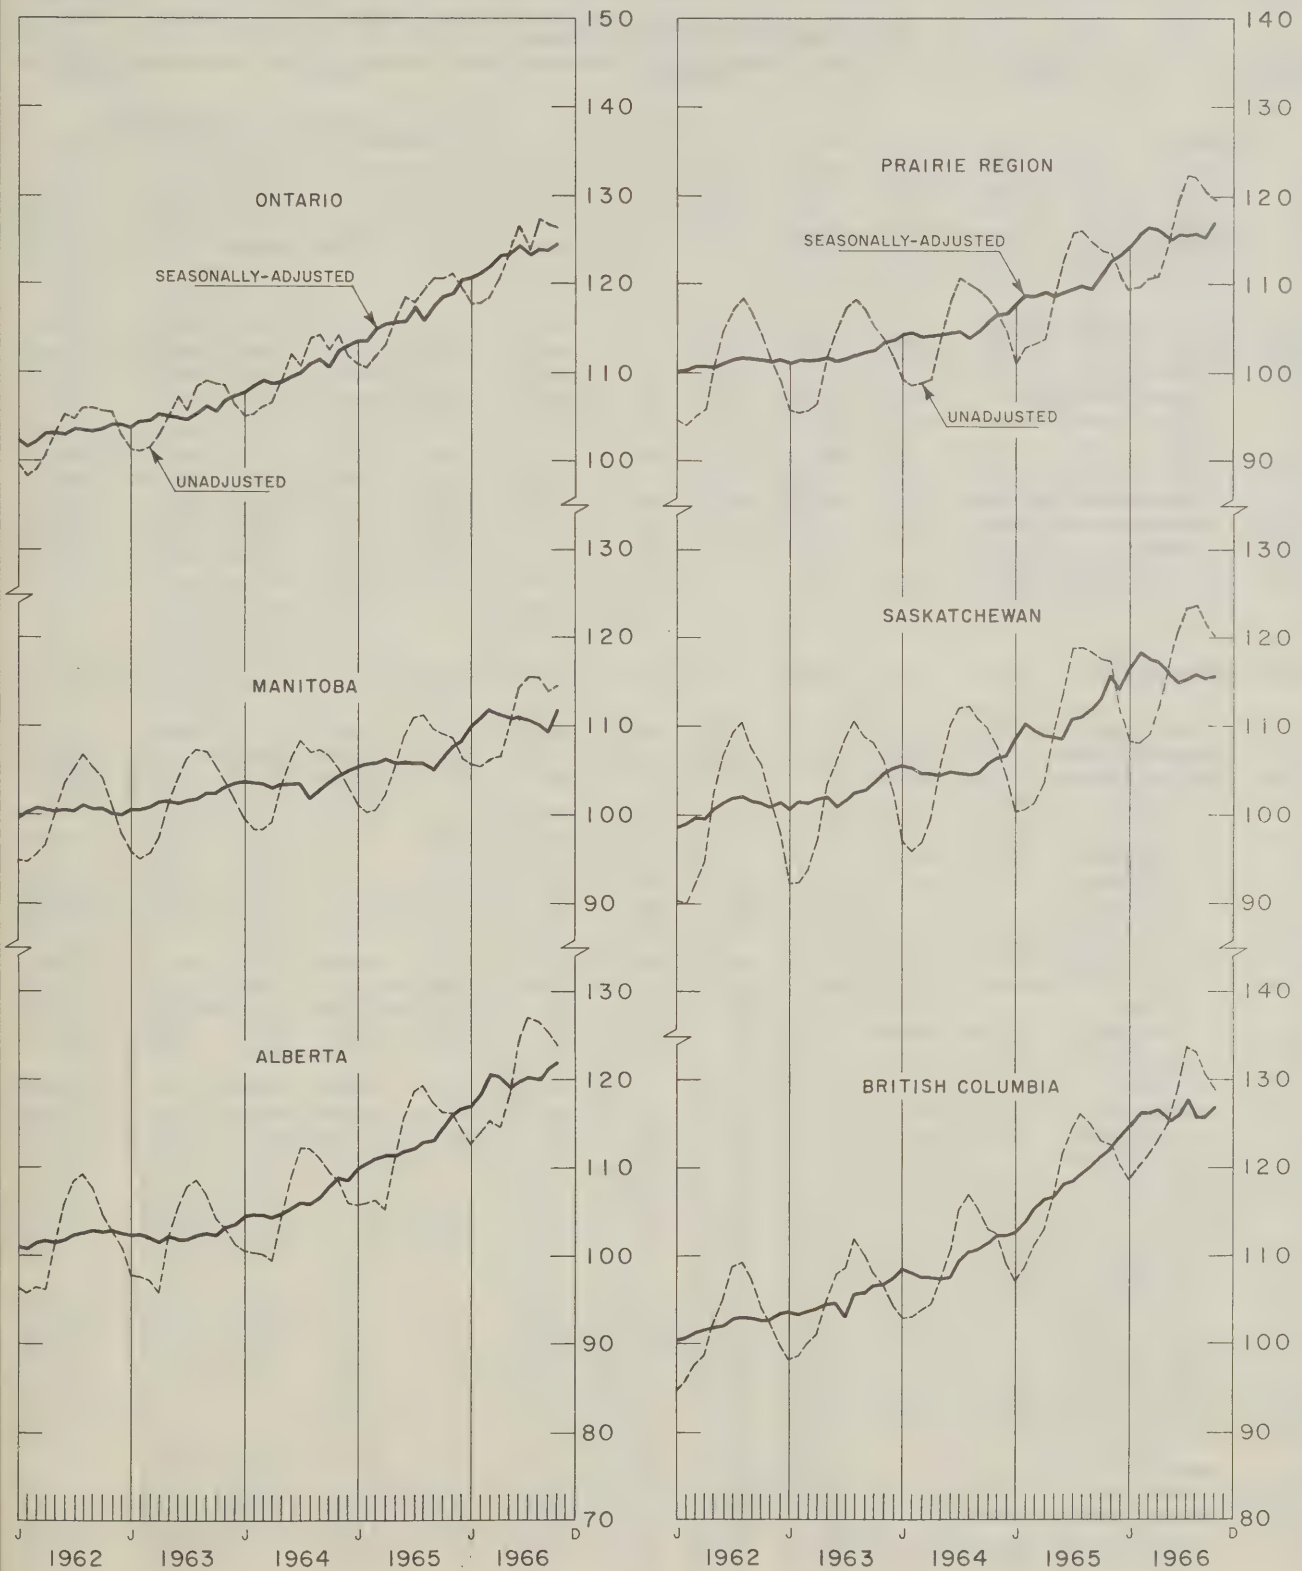

TABLE 4. Employment and Average Weekly Wages and Salaries, by Industry, for Canada

(2) Subject to revision.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages(1)

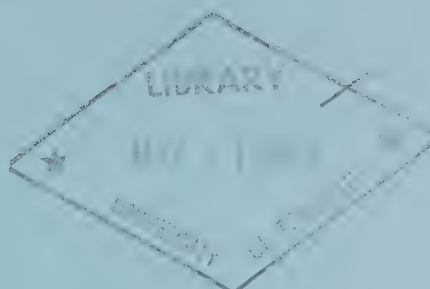

| Industry | Canada | Nfld. | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. |

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

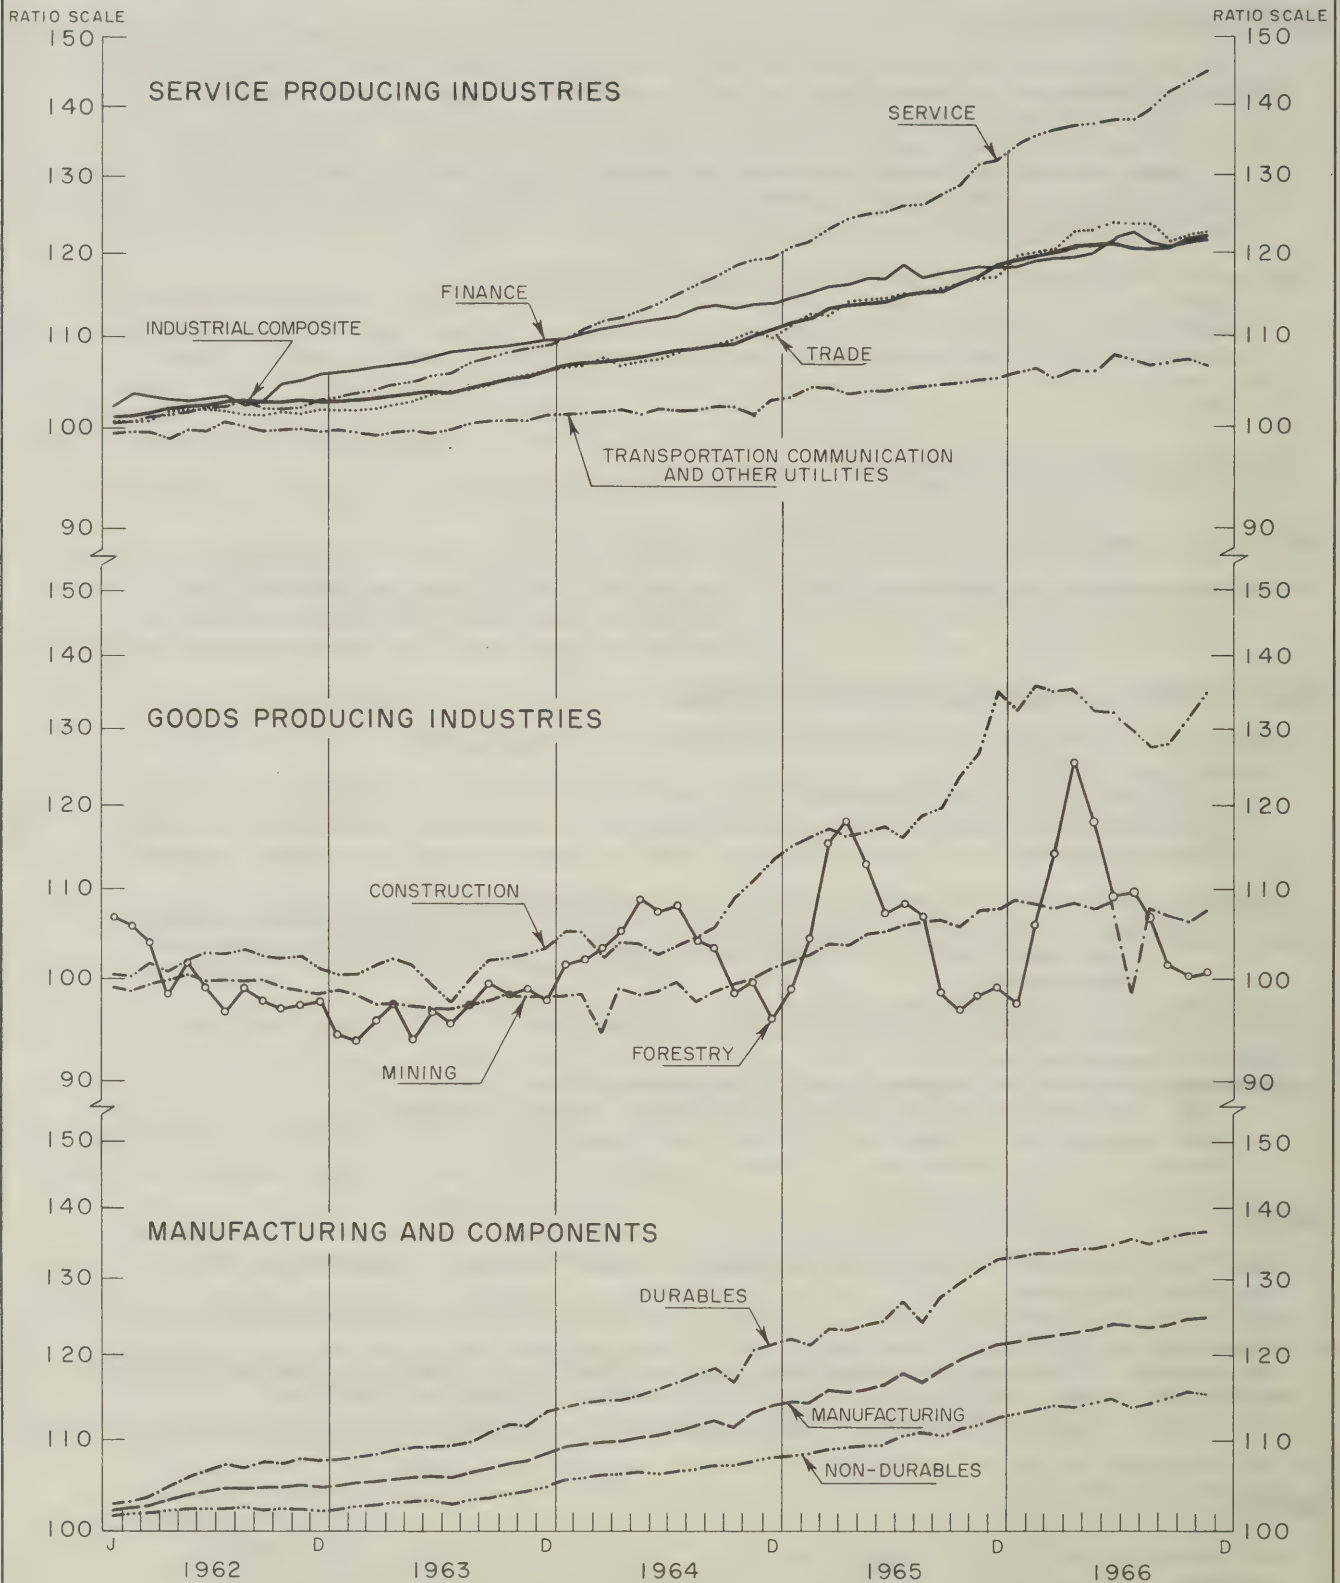

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

NOVEMBER 1966

EMPLOYMENT

The unadjusted composite index of employment (1961=100) declined slightly from 124.2 in October to 123.7 in November and was 4.2 p.c. higher than in November of last year. Seasonally-adjusted, the index at 122.3 was 0.3 p.c. above last month's level. All industries recorded increased seasonally-adjusted indexes except non-durable goods manufacturing and transportation, communication and other utilities, where there were small declines. Increases occurred in all Regions except the Atlantic Region and British Columbia, which recorded a small decline.

The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month.

Percentage Changes from last month in Selected Series of Seasonally-adjusted
and Unadjusted Employment Index Numbers, November 1966

| | Season- ally adjusted | Unadjusted for seasonal variation | | | | | |

(1) For other urban areas see Table 6.

AVERAGE WEEKLY WAGES AND SALARIES

At the composite level, average weekly wages and salaries at \$98.92 in November were 51 cents lower than in October and \$5.48 higher than in November of last year. Changes in industry divisions were mixed and generally small, ranging from a \$2.67 increase in forestry to a \$2.56 decline in construction. All regions recorded slight decreases with the exception of the Atlantic Region, where there was a small increase.

(1) Relatively few employees in this region.

(2) Seasonal layoffs of lower-paid employees.

(3) In Metal mining.

(4) Longer average hours in smelting and refining.

(5) In miscellaneous metal fabricating.

(6) Shorter average hours.

(7) Overtime payments.

(8) In motor vehicle assembling.

(9) Seasonal decline in number of lower-paid employees in canning.

(10) Seasonal short time.

(11) Longer average hours in other construction.

(12) No change from last month.

(13) Industrial dispute in water transport and services.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |
|-----------------------|-------------|---------------------|---------------------------|---------------------|------------------|---------------------|---------------|---------------------|-------------------|---------------------|--------------|---------------------|

(1) Table will be completed in subsequent publications as data become available.

(2) Subject to revision.

AVERAGE WEEKLY WAGES AND SALARIES, URBAN AREAS INDUSTRIAL COMPOSITE

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages (1)

| Industry | Canada | Nfld. | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. |

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$3.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$3.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-006 - Hiring and Separation Rates in Certain Industries - Semi-Annual - Price \$1.00 per year
(Data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price 75 cents
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, from 1945; charts and explanatory material).
- 72-203 - Earnings and Hours of Work in Manufacturing - Annual - Preliminary Report - Price 25 cents
(Separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in October for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SEASONALLY-ADJUSTED INDEX NUMBERS OF EMPLOYMENT (1961=100), CANADA INDUSTRIAL COMPOSITE AND MAJOR INDUSTRIAL DIVISIONS

EMPLOYMENT AND AVERAGE WEEKLY WAGES AND SALARIES

DECEMBER 1966

EMPLOYMENT

The December unadjusted composite index of employment (1961=100) declined from 123.8 in November to 120.6 and was 4.1 p.c. higher than in December, 1965. Seasonally-adjusted, the index at 122.8 was 0.7 p.c. above last month's level. Increases in the seasonally-adjusted index were recorded in all industry divisions and in all regions except British Columbia where there was a slight decline.

The footnotes to the tables below indicate some of the main factors underlying the larger variations from last month.

Percentage Changes from Last Month in Selected Series of Seasonally-adjusted and
Unadjusted Employment Index Numbers, December 1966

| Industry | Season- ally ad- justed | Unadjusted for seasonal variation | | | | | |
|--|-------------------------------|-----------------------------------|--------------------|-----------|-----------|-------------------|---------------------|
| | Canada | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |
| Forestry | 3.6 | - 10.4 | - 11.0 | - 11.1 | - 0.8 | - 17.2 | - 14.3 |
| Mining | 0.2 | - 1.3 | - 2.2 | - 3.6 | - 1.7 | 2.1 | - 1.7 |

(1) For other urban areas see Table 6.

AVERAGE WEEKLY WAGES AND SALARIES

At the composite level, average weekly wages and salaries at \$96.18 were \$2.63 lower than in November, mainly because of short-time associated with the year-end holidays. The December figure was \$5.18 higher than in December 1965.

Changes from Last Month in Selected Series of Average Weekly Wages and Salaries, December 1966

| Industry | Canada | Atlantic Region | Quebec | Ontario | Prairie Region | British Columbia |

(1) Relatively few employees in this region.

(2) Seasonal layoff of lower-paid employees.

(3) Overtime in metal mines.

(4) Short-time in metal mines.

(5) Short-time in most components.

(6) Short-time, reduced overtime payments in aircraft and shipbuilding.

(7) Short-time, reduced overtime payments in automotive industries.

(8) Reduced average hours in communications equipment.

(9) Layoffs of lower-paid canning employees.

(10) Increased average hours after settlement of industrial dispute in water transport.

Note: Statistics are based on returns received from employers having 20 or more employees in any month of the year. These returns include data for the last pay period(s) of reporting establishments in each month. The latest figures throughout this publication are subject to revision.

TABLE 2A. Index Numbers of Employment (1961=100), Seasonally-adjusted and Unadjusted, Goods-producing Industries, for Canada(1)

| Year and month | Forestry | | Mining, including milling | | Manufacturing | | | | | | Construction | |

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The wage-earner data are published in a monthly report "Man-Hours and Hourly Earnings", Catalogue No. 72-003. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation the data are grouped into industrial and geographic units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industry divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and parts of service.

The survey covers larger firms only, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a multiple establishment firm are included if the firm had 20 or more employees in total in any month of the year even though any particular establishment may have only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" criteria that was formerly used.

Coverage

The limitation of surveys to larger firms results in a large and relatively even coverage of total employment in the surveyed industry divisions in most provinces and urban areas. The industrial representation, though large, is more uneven; the proportion of employees covered depends on the organization of particular industries into larger or smaller establishments.

The table at the end of the notes shows annual employment in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms. A report on the total employment estimates is published monthly by the Employment Section, "Estimates of Employees by Province and Industry", Catalogue No. 72-008.

It is important to note that the statistics in the "Employment and Average Weekly Wages and Salaries" report itself do not represent estimates of total numbers of paid workers in specified areas or industries, but show only the distribution of men and women on the staffs of the co-operating employers in the reference period.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of working days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. For employees paid at annual or monthly rates, whose earnings are not affected by the number of working days in the month, fixed proportions are used to reduce the earnings to a weekly basis, without regard to the length of the calendar month. When a holiday, layoff or industrial dispute occurs in an establishment that reports a pay period that is different from the last week of the month, an adjustment is made to the data if the holiday, layoff or dispute affects the two periods differently.

The use of the last pay period in the month reduces double counting of individuals who work for more than one establishment in a period of several weeks. The Quebec forestry industry is an exception in that the turnover of wood workers paid on a monthly basis is high. Consequently this group reports on a special questionnaire which has an additional question on the average number of employees in the last week of the month.

Employees

The survey covers all wage-earners and salaried employees of reporting establishments who are paid for rendering current services or are on paid absence during the reference period except for casual employees working less than the equivalent of one full day in the pay period. Regular part-time employees are included. The employee concept excludes proprietors, directors and firms members including those who are actively engaged in the operation of the firm, pensioners, home-workers and persons providing services to an establishment on the basis of a contract for services.

Employees not receiving pay for any time during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or draw pay from their employers (e.g., unless they take paid vacations during the dispute). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuation in the series.

Payrolls

The payrolls of reported employees are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are salaries, straight-time wages, over-time wages, cost-of-living allowances, commissions, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The payroll concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the payroll data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated for publication each month show the numbers of women, the number of employees of both sexes and weekly payrolls for the current and preceding month. The statistics first published for each month are preliminary; re-tabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages, aggregates and index numbers are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities, or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual," DBS Catalogue No. 12-501. The "SIC code" columns in the main tables refer to this manual. The tables contain a few groups not found in the S.I.C. These includes:

Industrial composite - The sum of the industries tabulated

Durable goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products

Non-durable goods manufacturing - The sum of the remaining manufacturing industries

Building - The sum of general contractors and special trade contractors

Engineering - The sum of highways, bridges and streets and other construction

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres, and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas were based on a labour market concept; they usually include a main centre and surrounding territory. A list outlining the territory included in each of the tabulated urban areas is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain transportation and construction establishments, is included in the provincial totals but is not assigned to an urban centre.

Index Numbers

Index numbers are calculated by dividing the current month's employment by one-twelfth of the total base period employment. The current employment consists of all employment reported by establishments that meet our size criteria in the current period. Base year employment consists of the employment of establishments that had 20 or more persons in any month of 1961.

Seasonally-adjusted index numbers remove from the employment indexes these regularly recurring fluctuations known as "seasonal variations". The adjusted index numbers thus approximate the trend, cycle, and irregular components of the time series. A variant of the Census Method II is used to calculate the seasonally-adjusted index numbers.

Other Calculations

The average weekly wages and salaries figures are obtained by dividing weekly payrolls by the number of paid employees, including part-time employees and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages. The industrial composite figure for a given geographic unit is the aggregate of all data tabulated for that area.

Larger Firm Employment as a Percentage of Total Estimated Employment, by Industry Division,
for Canada and Provinces, 1964 Annual Averages(1)

| Industry | Canada | Nfld. | P.E.I. | N.S. | N.B. | Que. | Ont. | Man. | Sask. | Alta. | B.C. |
